Chapter 2, Part 2: 2000-2005 engines

Fig. 2-100: Spark plug

When working on the engine, it is important to follow the correct procedure. First, disconnect the battery to avoid any electrical shorts. Then, remove the cover and inspect the components. If you find any wear or damage, replace the parts immediately. Always use the correct tools and follow the manufacturer's instructions.

After inspecting the engine, you should check the oil level. Use a dipstick to measure the oil and add more if necessary. Also, check the coolant level and top it up if needed. Finally, make sure all the components are properly secured before starting the engine.
