Rules, Rubrics and Riches Shailaja Fennell,2013-02-01 *Rules Rubrics and Riches* highlights the limitations of existing approaches to understanding the relationship of the law to the process of development It interrogates neoclassical economic thinking that draws on the narrow rubric of self interest to understand the acquisition of riches It takes issue with both the traditional law and development movement that was unable to shake colonial overtones and the more recent law and economics school that continues to emphasise the centrality of rational man at the micro level and the superiority of linear models of economic progress at the macro level Written as an analysis of and commentary on the contribution of the law to international development using legal cases and development trajectories in China India and Malaysia the book makes the case that individuals do not operate in a vacuum but rather within the social contexts of larger human structures such as family community and nation *Rules Rubrics and Riches* is distinctive in the view that demanding equality for the individual is inappropriate if this occurs without looking at the broader context of the need for equity within families communities and nations The book offers a new frame for law and development thinking that point to a new set of rules using a broader rubrics to ensure a sustainable accumulation of riches It will be of interest to students and scholars working in the fields of law and development development studies and international and comparative law **Justice for Animals** Martha C.

Fellenz,2010-10-01 The Moral Menagerie offers a broad philosophical analysis of the recent debate over animal rights Marc Fellenz locates the debate in its historical and social contexts traces its roots in the history of Western philosophy and analyzes the most important arguments that have been offered on both sides Fellenz argues that the debate has been philosophically valuable for focusing attention on fundamental problems in ethics and other areas of philosophy and for raising issues of concern to both Anglo American and continental thinkers More provocatively he also argues that the form the debate often takes attempting to extend our traditional human centered moral categories to cover other animals is ultimately inadequate Making use of the critical perspectives found in environmentalism feminism and post modernism he concludes that taking animals seriously requires a more radical reassessment our moral framework than the concept of animal rights implies **How to Create and Use Rubrics for Formative Assessment and Grading** Susan M.
