All Joy And No Fun The Paradox Of Modern Parenthood:

All Joy and No Fun Jennifer Senior, 2014-02-19 Award winning journalist Jennifer Senior tries to tackle the issue of the effects of children on their parents isolating and analyzing the many ways in which children reshape their parents lives whether it s their marriages their jobs their habits their hobbies their friendships or their internal senses of self She argues that changes in the last half century have radically altered the roles of today s mothers and fathers making their mandates at once more complex and far less clear Recruiting from a wide variety of sources in history sociology economics psychology philosophy and anthropology she dissects both the timeless strains of parenting and the ones that are brand new and then brings her research to life in the homes of ordinary parents around the country The result is an unforgettable series of family portraits starting with parents of young children and progressing to parents of teens Through lively and accessible storytelling Senior follows these mothers and fathers as they wrestle with some of parenthood s deepest vexations and luxuriate in some of its finest rewards All Joy and No Fun makes us reconsider some of our culture s most basic beliefs about parenthood all while illuminating the profound ways children deepen and add purpose to our lives All Joy and No Fun is original and essential reading for mothers and fathers of today and tomorrow *Purpose* Samuel T. Wilkinson, 2024-03-05

By using principles from a variety of scientific disciplines Yale Professor Samuel Wilkinson provides a framework for human evolution that reveals an overarching purpose to our existence Generations have been taught that evolution implies there is no overarching purpose to our existence that life has no fundamental meaning We are merely the accumulation of tens of thousands of intricate molecular accidents Some scientists take this logic one step further suggesting that evolution is intrinsically atheistic and goes against the concept of God But is this true By integrating emerging principles from a variety of scientific disciplines ranging from evolutionary biology to psychology Yale Professor Samuel Wilkinson provides a framework of evolution that implies not only that there is an overarching purpose to our existence but what this purpose is With respect to our evolution nature seems to have endowed us with competing dispositions what Wilkinson calls the dual potential of human nature We are pulled in different directions selfishness and altruism aggression and cooperation lust and love When we couple this with the observation that we possess a measure of free will all this strongly implies there is a universal purpose to our existence This purpose at least one of them is to choose between the good and evil impulses that nature has created within us Our life is a test This is a truth as old as history it seems that has been espoused by so many of the world s religions From a certain framework these aspects of human nature including how evolution shaped us are evidence for the existence of a God not against it Closely related to this is meaning What is the meaning of life Based on the scientific data it would seem that one such meaning is to develop deep and abiding relationships At least that is what most people report are the most meaningful aspects of their lives This is a function of our evolution It is how we were created
