Enhancing Teaching and Learning through Assessment Steve Frankland, 2007-10-17 Assessment is the daily life of a teacher designing plans setting questions giving feedback and grading are all activities that teachers undertake on a regular basis Yet the close examination of such activities can be hindered by constraints caused by the context in which different teaching and learning activities occur and an unawareness of the effect that assessment has on the students themselves This book provides a practical guide on the effective use of assessment It includes the use of assessment tools and pedagogical design that help students deepen their learning Major issues on assessment and some excellent examples are presented as a useful resource to university teachers in enhancing teaching and students learning It will also be found useful by teachers when implementing various assessment methods School administrators and teaching development professionals will find the book useful when making decisions related to learning and teaching issues in their institutions Thinking Through the Test D. and Claire Sweet a returning adult coed who is both cool and mysterious Holly and Claire too have their own hopes as does the short and cynical Jimmy Stubbs who hates to study and loves to drink beer and scheme The hopes of each character intersect and eventually violently knotOCoproducing a twisting climax that leaves some characters dead and others about to savor an astounding financial windfall By turns violent and funny A Self Made Monster is one of the most unusual vampire novels ever published It strips away the tired clichés and purple prose of the vampire story and replaces them with dead on characterizations a galloping plot and a new conception of the vampire itself Boson Books also offers Flunky and Prelude to Hemlock by Steve Vivian For an author bio and photo reviews and a reading sample visit bosonbooks.com

Educational and Psychological Measurement ,1959 **Techniques** ,1998 Making education and career connections **Tales from the Northeast** Richard A. Pazasis,2024-06-27 Writing is finally about one thing going into a room alone and doing it putting words on paper that have never been in quite that way before William Goldman award winning author and screenwriter The northeastern section of the United States specifically Connecticut Maine Massachusetts New Hampshire New York Rhode Island and Vermont offers us some of the richest history in our nation There is a plethora of well known geographical areas and individuals that and who have been a significant influence on our country's great history In addition there are many not so well known geographical areas and individuals that and who have also made such remarkable contributions Because of what seems to be a modern day lack of knowledge and appreciation for our country's history including a recent trend to erase documented records of actual historical events and statues of prominent individuals I have decided to compose several short stories highlighting both well known and not so well known geographical areas and individuals from the northeastern section of the United States that and who have made significant contributions to our great nation's history I have chosen to present such information in a fictional short story format just as several very early American writers did which is described within the introduction to a compendium entitled Great American Short Stories published by the Fall River Press of New York City According to the publisher Americans have been writing short stories for almost as long as Americans have been writing fiction in which writers strove to capture the character of their fledgling country In addition the publication mentioned that writers like Washington Irving Nathaniel Hawthorne and Edgar Allen Poe used the short story format because it showed itself to be adaptable to a wide variety of themes and approaches that might not have been executed as well at novel length and that found it the perfect tool for turning folklore and superstitions into literary tall tales In addition I have selected to utilize the short story format as the result of being influenced by one of our country's most prolific authors Stephen King Although mostly known for his novels Stephen King felt that short stories were too much forgotten He authored many short stories himself and stated that The leap of faith necessary to make the short story happen has gotten particularly tough in the last few years these days it seems that everything wants to be a novel He also wrote that A short story is a different thing altogether a short story is like a quick kiss in the dark from a stranger Whether or not today's readers have short attention

spans I feel that having utilized a short story structure has allowed me to present important historical facts and my thoughts in a most concise quick kiss format thus enticing the public to be more inclined to read about or great nation s history And since Stephen King also wrote that Fiction is the truth inside the lie all my short stories are a combination of true historical and scientific facts as well as made up scenarios or storylines Finally although the main characters and storylines in my short stories are fictional the facts related to the geographical areas historical individuals and scientific facts are real After Moonrise P.C.
