Invertebrate Learning and Memory Randolph Menzel,Paul

Benjamin,2013-06-18 Understanding how memories are induced and maintained is one of the major outstanding questions in modern neuroscience This is difficult to address in the mammalian brain due to its enormous complexity and invertebrates offer major advantages for learning and memory studies because of their relative simplicity Many important discoveries made in invertebrates have been found to be generally applicable to higher organisms and the overarching theme of the proposed will be to integrate information from different levels of neural organization to help generate a complete account of learning and memory Edited by two leaders in the field Invertebrate Learning and Memory will offer a current and comprehensive review with chapters authored by experts in each topic The volume will take a multidisciplinary approach exploring behavioral cellular genetic molecular and computational investigations of memory Coverage will include comparative cognition at the behavioral and mechanistic level developments in concepts and methodologies that will underlie future advancements and mechanistic examples from the most important vertebrate systems nematodes molluscs and insects Neuroscience researchers and graduate students with an interest in the neural control of cognitive behavior will benefit as will as will those in the field of invertebrate learning Presents an overview of invertebrate studies at the molecular cellular neural levels and correlates findings to mammalian behavioral investigations Linking multidisciplinary approaches allows for full understanding of how molecular changes in neurons and circuits underpin behavioral plasticity Edited work with chapters authored by leaders in the field around the globe the broadest most expert coverage available Comprehensive coverage synthesizes widely dispersed research serving as one stop shopping for comparative learning and memory researchers Journal of Animal Science ,1987 **Research and Development in Progress** U.S. Atomic Energy Commission.
