Taking Religion Seriously Across the Curriculum Warren A. Nord, Charles C. Haynes, 1998 The authors chart a middle course in our war over religion and public education one that builds on a developing national consensus among educational and religious leaders While it is not proper for schools to practice religion or proselytize neither is it permissible to make them religion free zones Schools do not take religion seriously as the authors review of textbooks and the new national content standards makes clear In Part One they outline the civic constitutional and educational frameworks that should shape the treatment of religion in the curriculum and classroom In Part Two they explore major issues relating to religion in different domains of the curriculum in elementary education and in middle and high school courses in history civics economics literature and the sciences They also discuss Bible courses and world religions courses and explore the relationship of religion to moral education and sex education

The Conscious Teacher Deborah Nichols Poulos, 2020-01-13 The Conscious Teacher is about all kinds of strategies and techniques educators might employ to become more effective teachers In an accessible conversational style Deborah Nichols Poulos presents unique approaches to teaching that will inspire new and veteran teachers alike She begins with her personal story of not being able to read all through elementary school Her early failures convinced her she was dumb At first she struggled but when she still failed she adopted an avoidance strategy that served her well until junior high An experience in the seventh grade flipped a switch and started her on a journey to becoming an outstanding student and later to applying the lessons she learned as a child to her own teaching What makes The Conscious Teacher unique are the inspirational lessons that are unlike what most teachers get in their teacher education courses or student teaching Ms Nichols Poulos points out for example that from the very first day it is important that students learn they will be treated with dignity and respect no matter what And especially helpful are the steps Ms Nichols Poulos employs to set up a behavior management plan that works She explains the strategic steps she takes before school starts how essential it is to get to know each student before they walk into class on that first day She also illustrates how setting up classroom routines helps students know what to expect and how to make the best use of every minute And she emphasizes the importance of the parent student teacher team and includes many examples of how to communicate with and involve parents even those who may be difficult Foundational to her program are reading and writing Among other things she lays out the steps for students even as early as fourth grade to write five paragraph essays and their own student authored

books and to research and write reports that include bibliographies When she differentiated curriculum to support all students needs she found their learning accelerated All teachers will appreciate her ideas about how to teach the basics of math as well as advanced math concepts And her ideas for teaching the arts are inspirational as she describes in detail how her fourth graders performed Shakespeare s Hamlet Macbeth King Lear Julius Caesar and A Midsummer Night s Dream She also shows how to integrate social studies with literature and writing Her experiences taught her that young students are much more capable than many people realize The Conscious Teacher is an indispensable guide for all new teachers Many of the ideas Ms Nichols Poulos provides will also be an eye opener for parents and experienced teachers as well The Conscious Teacher is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling **Educational Materials Laboratory Report** ,1964 **CA TE VOL 1 ANCIENT CIV RFLC 0**

Ferguson,Ginevra Ralph,2001-10-15 Today s students are more diverse than ever before in cultural backgrounds learning styles and interests social and economic classes and abilities and disabilities How can schools accommodate these differences while also dealing with the many other demands for change from the push for tougher standards to the call for more discipline in the classroom This book offers answers and challenges schools to reinvent themselves as more flexible creative learning communities that include and are responsive to a full range of human diversity The authors propose a systemic change framework that structures change efforts at district school and classroom levels Their approach rests on three main ideas Locate decisions with groups of teachers Create new roles for teachers Redesign individualized education plans Using these ideas as a starting point they describe strategies to help teachers design personalized curriculum and

teaching that will accommodate the widest possible student diversity including students who are officially designated as disabled They provide a variety of practical tools for gathering information about students developing long term curriculum plans planning lessons tailoring learning experiences creating classroom based assessment systems writing individually tailored education reports and reflecting on one s own teaching The book reflects 15 years of collaboration and learning among groups of educators trying to improve their teaching practices in the face of dizzying changes The authors believe their synthesis of learning and professional development finally undoes the separation of general and special education and accomplishes what they think is the real purpose of schooling to help all students become active valued members of their community Note This product listing is for the Adobe Acrobat PDF version of the book
