Observer's Handbook 2008 Patrick Kelly, 2007-09 Handbook of Space Resources Viorel Badescu, Kris Zacny, Yoseph Bar-Cohen, 2023-04-27 Earth has limited material and energy resources while these resources are virtually unlimited in space. It is only a matter of time before planetary resources are mined and used in situ to sustain human and robotic exploration or returned to Earth for commercial gain. This book covers a number of aspects related to space resources. In particular, subjects related to mission concepts, exploration approaches, mining and extraction technologies, commercial potential, and regulatory aspects of space resources are covered in detail. This book is therefore a good resource for readers who seek background and deeper understanding of space resources related activities.

Guidance and Control 2008 Michael E. Drews, Robert D. Culp, 2008 *Routledge Handbook of Space Policy* Thomas Hoerber, Mariel Borowitz, Antonella Forganni, Bruno Reynaud de Sousa, 2024-12-30 This volume offers a comprehensive overview of the field of space policy. Space is a technology-driven domain, and policy development has accelerated in recent years at a time when the space economy has begun to show remarkable potential. Thus, this handbook gathers experts from different fields with the aim of 1) offering an overview of the state of play regarding space policy issues and 2) expanding knowledge about possible future developments. Given the cross-disciplinary nature of the subject and its vast scope, the authors' contributions are grouped within different thematic sections as follows: Theoretical structures for an understanding of space policies; The history of space; Society, justice, and the human impact; Governance of space; Popularisation of space; New frontiers in space and expansion into the unknown; World space policies by geographic areas. The introduction and the conclusion chapters provide a coherent connection between the contributions, with each section presenting transversal themes such as power dynamics and rules, commercialisation, sustainability, militarisation, applications, and domestic use, and justice. This volume will be of much interest to students of space policy and power, security studies, and international relations.
