Hypothesis: The survival and growth of microorganisms depends upon the concentration of disinfectant

1 Think about the research that you did to find out how to test this hypothesis.

Name two sources that you used for your research.

1. *High Science* by Tim Bealwright, Ann Fullick, Patrick Fullick published by Nelson Thornes

2. Internet
<http://www.scribd.com/doc/5044756/SciProg2009/Charleya1.html>

Which of these sources was the more useful, and why?

The internet was the best because it gave me some good ideas about how to do the investigation. I had to change the independent variable from type of disinfectant (in the one on the internet) to concentration of disinfectant for my experiment. The book was not so good because it only talked about killing bacteria and antibiotics and didn't give a method.

(2 marks)

2 In this investigation, you will need to control some variables.

3/3

Two resources both fully referenced. It is not necessary to quote full URLs, the name of the website is sufficient. The text quoted has title and author which are sufficient alone and also quotes the publisher.

Comments on both sources with a clear explanation as to why one source was better than the other (had the basis of a method that could be developed).
