transfer The Tractatus de Sphaera by Johannes de Sacrobosco 1195 1256 the standard university textbook for astronomy from the thirteenth until the seventeenth century was particularly noted as containing volvelles of different kinds The project The Sphere located at the Max Planck Institute for the History of Science in Berlin has collected a corpus of 359 printed De sphaera editions building a promising basis for examining different volvelles and placing the results in a cultural context These volumes had never been analyzed in detail before nor was there such a large corpus that could provide a quantitative database for such an investigation The results of the book show that a book and knowledge tradition as widespread as that of the Sphaera contained more than one third of volvelles and was used in university teaching in the early modern period For historians this sheds light on a new aspect of movable paper instruments in university didactics and book history in the early modern period *Hardware* ,1899 **Journal of Research of the National Bureau of Standards** United States.
