the source of this divide in differing framing assumptions reductionist pluralist on one side holist communitarian on the other The book argues that we must bridge this divide drawing on the resources from both encampments if we are to understand and cope with the distinctive problems posed by genetic engineering These problems termed fractious problems are novel complex ethically fraught unavoidably of public concern and unavoidably divisive Berry examines three prominent ethical and political theories utilitarianism Kantianism and virtue ethics to consider their competency in bridging the divide and addressing these fractious problems The book concludes that virtue ethics can best guide parental decision making and that a new policymaking approach sketched here a navigational approach can best guide policymaking These approaches enable us to gain a rich understanding of the problems posed and to craft resolutions adequate to their challenges **An**
