

QUESTION 12

- (a)
- The number of photoelectrons emitted per second is directly proportional to the intensity of radiation.
 - The energy of the emitted electrons depend on the frequency of the incident radiation.
 - There exists a threshold frequency for all surfaces, below which no electrons are emitted no matter the intensity of radiation.

(b) Given: Power of source = 6×10^{-3} Watts or Joules / s
 No of photons per second = 1×10^{16}

$$\text{Energy per photon} = \frac{\text{Power}}{\text{no of photons per second}}$$

$$= \frac{6 \times 10^{-3}}{1 \times 10^{16}}$$

$$E = hf = 6 \times 10^{-19} \text{ Joules}$$

Energy = $hf - W_0 = eV_0$ where W_0 is work function.
 $E - eV_0 = W_0$ where V_0 is stopping potential

$$6 \times 10^{-19} - (1.6 \times 10^{-19}) \times (2.2) = W_0$$

$$6 \times 10^{-19} - 3.52 \times 10^{-19} = W_0$$

$$W_0 = 2.48 \times 10^{-19} \text{ Joules}$$

$$W_0 = \frac{2.48 \times 10^{-19}}{1.6 \times 10^{-19}} \text{ eV}$$

$$W_0 = 1.55 \text{ eV}$$

Lloyd I. Rudolph, Susanne Hoeber Rudolph, 2010-07-15 Gandhi with his loincloth and walking stick seems an unlikely advocate of postmodernism But in Postmodern Gandhi Lloyd and Susanne Rudolph portray him as just that in eight thought provoking essays that aim to correct the common association of Gandhi with traditionalism Combining core sections of their influential book Gandhi The Traditional Roots of Charisma with substantial new material the Rudolphs reveal here that Gandhi was able to revitalize tradition while simultaneously breaking with some of its entrenched values and practices Exploring his influence both in India and abroad they tell the story of how in London the young activist was shaped by the antimodern other West of Ruskin Tolstoy and Thoreau and how a generation later a mature Gandhi's thought and action challenged modernity's hegemony Moreover the Rudolphs argue that Gandhi's critique of modern civilization in his 1909 book Hind Swaraj was an opening salvo of the postmodern era and that his theory and practice of nonviolent collective action satyagraha articulate and exemplify a postmodern understanding of situational truth This radical interpretation of Gandhi's life will appeal to anyone who wants to understand Gandhi's relevance in this century as well as students and scholars of politics history charismatic leadership and postcolonialism *Resources in Education*, 1990 *Catalog of Copyright Entries. Categories Giuseppe D' Anna, Lorenzo Fossati, 2018-03-01 Das Nachdenken über die Kategorien markiert einen grundlegenden Bergang in der Geschichte der Philosophie Durch die Theoretisierung dieses Problems erhält die Philosophie jenen metareflexiven Charakter der wahrscheinlich eines der typischeren Merkmale philosophischen Wissens und ihrer Methode darstellt Das Kategorienproblem wurde im Laufe der Geschichte der Philosophie schrittweise durchdrungen aber nie endgültig gelöst In dieser Hinsicht kann die Geschichte der Kategorien im Rahmen der Philosophie nicht als abgeschlossen gelten tatsächlich wird das Kategorienthema vom Altertum bis in die Gegenwart hinein analysiert und diskutiert ohne dass seine theoretische Fruchtbarkeit bereits erschöpft wäre Die aktuelle Kategorienforschung muss sich unweigerlich mit der Geschichte der Kategorien befassen wenn sie Fortschritte erzielen und bereits in der Vergangenheit begangene Fehler vermeiden will Hieraus ergibt sich eine der Aufgaben des vorliegenden Bandes der von dem Bedeutsamen ausgeht Perspektiven und Wege der Kategoriengeschichte aufzuzeigen Das Ergebnis ist nicht erschöpfend vielmehr wird ein erster und partieller Beitrag zu einem ausgedehnteren Projekt vorgelegt The reflection upon the categories leaves a fundamental mark in the history of philosophy By theorizing such issue philosophy gains a meta reflexive feature which is probably one of the most distinguishing traits of this kind of knowledge including its method In the history of philosophy the question of the categories has been gradually investigated and clarified but it still remains to be solved Therefore from a philosophical perspective the history of the categories is far from coming to an end since ancient times it has been debated and discussed thus revealing all its theoretical potential Such a broad history should be taken into account by any present study that wants to represent a real

progress in the research in order to avoid repeating errors that have been already made in the past Among other things this is one of the objectives of the present volume which comes from the will to describe some paths and perspectives of this history without claiming to deliver an exhaustive overview and rather representing the first partial contribution to a wider project

Biolinguistics Lyle Jenkins, 2000 This book investigates the nature of human language and its importance for the study of the mind In particular it examines current work on the biology of language Lyle Jenkins reviews the evidence that language is best characterized by a generative grammar of the kind introduced by Noam Chomsky in the 1950s and developed in various directions since that time He then discusses research into the development of language which tries to capture both the underlying universality of human language as well as the diversity found in individual languages Universal Grammar Finally he discusses a variety of approaches to language design and the evolution of language An important theme is the integration of biolinguistics into the natural sciences the unification problem Jenkins also answers criticisms of the biolinguistic approach from a number of other perspectives including evolutionary psychology cognitive science connectionism and ape language research among others
