Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications, Consumer Protection, and Finance,1983 Renaissance Siena A. Lawrence Jenkins,2005-08-01 The art of Renaissance Siena is usually viewed in the light of developments and accomplishments achieved elsewhere but Sienese artists were part of a dynamic dialogue that was shaped by their city s internal political turmoil diplomatic relationships with its neighbors internal social hierarchies and struggle for self definition These essays lead scholars in a new and exciting direction in the study of the art of Renaissance Siena exploring the cultural dynamics of the city and its art in a specifically Sienese context This volume shapes a new understanding of Sienese culture in the early modern period and defines the questions scholars will continue to ask for years to come What emerges is a picture of Renaissance Siena as a city focused on meeting the challenges of the time while formulating changes to shape its future Central to these changes are the city s efforts to fashion a civic identity through the visual arts *Language and Social Change in Central Europe* Patrick Stevenson,2010-07-31 This book explores the dynamics of language and social change in central Europe in the context of the end of the Cold War and eastern expansion of the European Union One outcome of the profound social transformations in central Europe since the Second World War has been the reshaping of the relationship between particular languages and linguistic varieties especially between national languages and regional or ethnic minority languages Previous studies have investigated these transformed relationships from the macro perspective of language policies while others have taken more fine grained approaches to individual experiences

with language. Combining these two perspectives for the first time and focusing on the German language which has a uniquely complex and problematic history in the region, the authors offer an understanding of the complex constellation of language politics in central Europe. Stevenson and Carl's analysis draws on a range of theoretical, conceptual and analytical approaches: language ideologies, language policy, positioning theory, discourse analysis, narrative analysis and life histories, and a wide range of data sources from European and national language policies to individual language biographies. The authors demonstrate how the relationship between German and other languages has played a crucial role in the politics of language and processes of identity formation in the recent history of central Europe.
