HUMAN ANATOMY AND PHYSIOLOGY

Study of the human organism and its internal body

Anatomy

The study of the structure and organization of the human body

Physiology

The study of the function and processes of the human body

Structural levels

How studying the structural levels of the body can help us understand the function and processes of the body

- 1. **Chemical level** - study of the chemical composition of the body
- 2. **Cellular level** - study of the structure and function of cells
- 3. **Tissue level** - study of the structure and function of tissues
- 4. **Organ level** - study of the structure and function of organs
- 5. **System level** - study of the structure and function of systems
- 6. **Organism level** - study of the structure and function of the whole organism

CELLS AND TISSUES

Cells are the basic units of structure and function of the body

Characteristics of cells

All cells are eukaryotic and have a nucleus

Cells are specialized to perform specific functions

Cells are surrounded by a cell membrane

Cells are connected to each other by gap junctions

Cells are able to communicate with each other

Cells are able to respond to their environment

Cells are able to reproduce

Cells are able to die

Cells are able to move

Cells are able to sense

Cells are able to think
