Unravelling the algae Juliet Brodie, Jane Lewis, 2007-11-26 Acting as titans in global control of the biosphere and colonizing virtually all corners of the earth algae extremely diverse and numerous oxygenic photosynthetic organisms can be major players in and drivers of environmental change For hundreds of years since their evolutionary origins by endosymbiosis when a protozoan enslaved a cyanobacter

Government Reports Announcements & Index , 1979-08

Sperm Competition and the Evolution of Animal Mating systems Robert L. Smith, 2012-12-02 Sperm Competition and the Evolution of Animal Mating Systems describes the role of sperm competition in selection on a range of attributes from gamete morphology to species mating systems This book is organized into 19 chapters and begins with the conceptualization of sperm competition as a subset of sexual selection and its implications for the insects The following chapter describes the relationship between multiple mating and female fitness with an emphasis on determining the conditions under which selection on females is likely to counteract selection on males for avoiding sperm

competition Other chapters consider the female perspective on sperm competition the evolutionary causation at the level of the individual male gamete and the correlation of high paternal investment and sperm precedence in the insects The remaining chapters are arranged phylogenetically and explore the sperm competition in diverse animal taxa such as the *Drosophila* Lepidoptera spiders amphibians and reptiles These chapters also cover the evolution of direct versus indirect sperm transfer among the arachnids or the problem for kinship theory presented by multiple mating and sperm competition in the Hymenoptera This book further discusses the remarkable potential for sperm competition among certain temperate bat species whose females store sperm through winter hibernation and the mixed strategies and male caused female genital trauma as possible sperm competition adaptations in poeciliid fishes The concluding chapter examines the predictions concerning testes size and mating systems in the primates and the possible role of sperm competition in human selection This book is of great value to reproductive biologists and researchers

Evo-Devo of Color Pattern Formation Ricardo
Mallarino, Marcus Kronforst, Marie Manceau, 2021-11-01 **Current Science** ,1984 **Resources in Education** ,1987
