Student Exploration: Building DNA

Vocabulary: double helix, DNA, enzyme, mutation, nitrogenous base, nucleoside, nucleotide, replication

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

DNA is an incredible molecule that forms the basis of life on Earth. DNA molecules contain instructions for building every living organism on Earth, from the tiniest bacterium to a massive blue whale. DNA also has the ability to **replicate**, or make copies of itself. This allows living things to grow and reproduce.

1. Look at the DNA molecule shown at right. What does it look like?

A double helix strand

This shape is called a **double helix**.

2. Based on this picture, how do you think a DNA molecule makes a copy of itself? (Hint: Look at the bottom two "rungs" of the ladder.)

The DNA strands separated the enzyme called DNA polymerase which copies each strand using the base-pairing rule.

Gizmo Warm-up

The *Building DNA Gizmo™* allows you to construct a DNA molecule and go through the process of DNA replication. Examine the components that make up a DNA molecule.

1. What are the two DNA components shown in the Gizmo?

Nucleosides and Phosphates

2. A **nucleoside** has two parts: a pentagonal sugar (deoxyribose) and a **nitrogenous base** (in color). When a nucleoside is joined to a phosphate, it is called a **nucleotide**.

How many different nitrogenous bases do you see? Four different nitrogenous bases

Note: The names of these nitrogenous bases are adenine (red), cytosine (yellow), guanine (blue), and thymine (green).

Palmer, Jr., 2024-10-17 Forensic DNA analysis was first introduced to the American criminal justice system in the mid 1980s. Since then, DNA testing has become the leading forensic tool both for obtaining sexual assault criminal convictions and for establishing the innocence of criminal suspects and wrongfully convicted defendants. This encyclopedia provides straightforward information on the role of DNA in the American courts. Entries explain the relationship of forensic DNA analysis to microbiology, population genetics, statistics, and the legal rules of the admissibility of scientific evidence. Full texts preceded by summaries are presented of all the statutes created by the states and the federal government that address the forensic use of DNA analysis and the edited text of judicial case opinions that address specific DNA issues. There are many entries on organizations that use DNA testing to free wrongly convicted defendants and on individuals who were released from prison, many from death row, after DNA tests proved their innocence. [The Science of Children's Wellbeing](#) Duncan Gillard, Corinna Grindle, Nic Hooper, Freddy Jackson Brown, Russell Hancock, 2023-12-12 This essential book is packed full of comprehensive guidelines and practical resources for running wellbeing intervention sessions for children aged 7 to 11, drawing from the scientifically grounded Six Ways to Wellbeing and the DNA V model. These principles have been translated into 36 step-by-step sessions to develop children's wellbeing and psychological flexibility and support those struggling with aspects of their mental health. The sessions can be delivered by educators with the whole class, with small groups as targeted wellbeing interventions, or easily adapted to fit one-to-one contexts. The Six Ways to Wellbeing sessions include: Be Active (staying physically active and exercising regularly), Self Care (engaging in good quality self-care behaviours), Connect with Others (connecting with others socially in ways that feel genuine, authentic, and fulfilling), Give to Others (engaging in kind, thoughtful, and giving behaviours toward others and the wider world), Challenge Yourself (encouraging learning that feels personally challenging to grow and develop new skills), Embrace the Moment (taking notice of the world around you and embracing and appreciating the moment). Easy to follow and requiring no previous training, this book is the ideal resource for primary school teachers and leaders, psychologists, mental health practitioners, school counsellors, SENCos, LSAs, ELSAs, and learning mentors looking to support and improve children's wellbeing within their professional roles.
