Critical Terms for Art History, Second Edition Robert S. Nelson,Richard Shiff,2010-03-15

Art has always been contested terrain whether the object in question is a medieval tapestry or Duchamp's Fountain. But questions about the categories of art and art history acquired increased urgency during the 1970s when new developments in critical theory and other intellectual projects dramatically transformed the discipline. The first edition of *Critical Terms for Art History* both mapped and contributed to those transformations offering a spirited reassessment of the field's methods and terminology. Art history as a field has kept pace with debates over globalization and other social and political issues in recent years making a second edition of this book not just timely but crucial. Like its predecessor this new edition consists of essays that cover a wide variety of loaded terms in the history of art from sign to meaning ritual to commodity. Each essay explains and comments on a single term discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art. For example Richard Shiff discusses Originality in Vija Celmins's *To Fix the Image in Memory* a work made of eleven pairs of stones each consisting of one original stone and one painted bronze replica. In addition to the twenty-two original essays this edition includes nine new ones performance style memory monument body beauty ugliness identity visual culture visual studies and social history of art as well as new introductory material. All help expand the book's scope while retaining its central goal of stimulating discussion of theoretical issues in art history and making that discussion accessible to both beginning students and senior scholars.
