Problem Statement

Consider equations that in undrugged equilibrium are given by

$$J_1 \dot{u}_1 = (J_2 - J_3 \sin u_2) u_2 + u_{21},$$

$$J_2 \dot{u}_2 = (J_3 - J_1 \sin u_1) u_1 + u_{22},$$

$$J_3 \dot{u}_3 = (J_1 - J_2 \sin u_3) u_3 + u_{33},$$

where u_1, u_2 and u_3 are the components of the angular velocity vector $\omega \in \mathbb{R}^3$ along the principal axes. Inputs u_{21}, u_{22} and u_{33} are the torque inputs applied about the principal axes and J_1, J_2 and J_3 are the principal mass moments of inertia.

Our differential equations of motion are obtained through application of Euler's so-called law of motion about the principal axes. Accordingly, construct

$$\sum_{i=1}^3 \mathbf{r}_i = J\omega = J\dot{\mathbf{u}},$$

where $\sum_{i=1}^3 \mathbf{r}_i \in \mathbb{R}^3$ is the summation of all the moments applied to the object and $J \in \mathbb{R}^{3 \times 3}$ is the inertia matrix. Suppose we assume the body fixed coordinate system aligned with the principal axes, that is

$$J = \begin{bmatrix} J_1 & 0 & 0 \\ 0 & J_2 & 0 \\ 0 & 0 & J_3 \end{bmatrix}.$$

It is also possible to write the vector product $\omega \times J\omega$ as a matrix equation

$$\omega \times J\omega = [\omega]_\times (J\omega),$$

Moore,Raphael Arar,2019-05-29 With recent advances in natural language understanding techniques and far field microphone arrays natural language interfaces such as voice assistants and chatbots are emerging as a popular new way to interact with computers They have made their way out of the industry research labs and into the pockets desktops cars and living rooms of the general public But although such interfaces recognize bits of natural language and even voice input they generally lack conversational competence or the ability to engage in natural conversation Today s platforms

provide sophisticated tools for analyzing language and retrieving knowledge but they fail to provide adequate support for modeling interaction. The user experience (UX) designer or software developer must figure out how a human conversation is organized, usually relying on commonsense rather than on formal knowledge. Fortunately, practitioners can rely on conversation science. This book adapts formal knowledge from the field of Conversation Analysis (CA) to the design of natural language interfaces. It outlines the Natural Conversation Framework (NCF) developed at IBM Research, a systematic framework for designing interfaces that work like natural conversation. The NCF consists of four main components: 1. an interaction model of expandable sequences, 2. a corresponding content format, 3. a pattern language with 100 generic UX patterns, and 4. a navigation method of six basic user actions. The authors introduce UX designers to a new way of thinking about user experience design in the context of conversational interfaces, including a new vocabulary, new principles, and new interaction patterns. User experience designers and graduate students in the HCI field, as well as developers and conversation analysis students, should find this book of interest.

Abingdon New Testament Commentaries: Mark Prof. C. Clifton Black, 2011-09-01. Mark's genius lies not in telling a story about Jesus but in creating conditions under which the reader may experience the peculiar quality of God's good news. The Evangelist hurries one along breathlessly, immediately making sure that the reader lurches with the characters into one pothole after another. What is this new teaching that consorts with the flagrantly sinful, turning the pious homicidal intimates into strangers and mustard seeds into the greatest of all shrubs? Jesus' closest adherents, the Twelve, are among the most muddled. Who can blame them? They ask for an obscure parable's interpretation and receive an answer even more confounding. They are told to feed thousands with next to nothing. Their boat almost capsizes while their teacher sleeps. As they oar in rough waters, the teacher strides the waves, intending to bypass them. Putting the reader in the same boat, Mark structures conversations with Jesus that make little sense if any. The Twelve are craven, stupid, self-serving, and disobedient; meet the average Christian. Besides, their hearts were hardened. Who hardens hearts? God. Should not God's Messiah lift the burdens of those following him? What kind of Christ heads to a cross, handing his disciples another for themselves? Do you not yet understand from the Introduction?

The Book of Answers Tanya Stivers, 2022 Imagine for a moment the only way to confirm a yes no question was by saying Yeah How different would this make our communication Relying on a large corpus of naturally occurring recordings of spontaneous social interaction this book explores all of the ways that we confirm questions in our everyday social lives Tanya Stivers analyzes what these different ways of responding allow us to do that is unique to each answer type When do we answer with Yeah rather than He is for instance or when do we use more complicated forms of confirming This information provides us with the basic response possibility space From that point we can examine what the range of responses in

particular answers tells us about what is important to us in managing social relationships through social interaction The book explains that we can conceptualize the response possibility space as having three dimensions alignment autonomy and affiliation Speakers rely on the details of their response to position themselves at a particular point in that three dimensional space sometimes accepting trade offs among the dimensions to achieve a stance that is higher in alignment and autonomy and lower in affiliation or higher in affiliation and autonomy but lower in alignment The Book of Answers uses real life conversations to find hidden patterns in how we do things together such as reach decisions tell stories or arrive at agreement or disagreement Delving into the science of how we talk this book investigates what those patterns tell us about human communication and our social lives Laser Beams Jean Martin,2001
