Question 1:

Could you briefly describe the multiple intelligences identified by Gardner?

Answer 1:

According to Gardner, intelligence is not a single entity. There are indeed many different types of intelligence.

Here are some key points about Gardner's thoughts on multiple intelligences.

- Intelligence is independent of each other.
- Different kinds of intelligence interact and work together to find solutions to problems.

Mr. Gardner has identified eight types of intelligence in him. Here are the details: Poets and writers are very linguistically intelligent. Logical-Mathematical skills mainly possess problem solving ability, very high on thinking logically, good at abstract reasoning and can solve mathematical problems with ease. Scientists and Nobel prize winners are good examples with Logical-Mathematical Intelligence.

Spatial skills are about understanding visual images and patterns. It refers to the ability to form, use and transform mental images. A pilot, a sailor, a sculptor, a painter, an architect, an interior his designer, a surgeon may have a highly developed spatial intelligence.

The Musical Skill provides a more detailed understanding of creating, creating, and manipulating musical patterns. A person with this intelligence is very sensitive to sound and vibration, and very sensitive to creating new sound patterns.

Physical-Kinaesthetic Using the whole body to solve a problem or assemble a product. Athletes, dancers, actors, athletes, gymnasts, and surgeons may possess such intelligence. Organize your feelings and build comfortable relationships with others. Psychologists, counselors, politicians, social his workers, and religious leaders are likely to have high levels of interpersonal intelligence, and philosophers and spiritual his leaders show examples of this kind of intelligence, increase.

Naturalistic skills involve recognizing relationships with the natural world. That is, analyzing the beauty of existing species, flora and fauna. Hunters, farmers, tourists, botanists, zoologists, and birdwatchers have a more naturalistic intelligence.

The Significance of Research Early in my therapeutic practice several clients achieved amazing results that psychology could not explain This led to the initiation of an extensive research project The research was met with skepticism as many believed it was impossible to investigate what After 9 years of analyzing mental processes in clients I discovered how mental disorders are mentally constructed and the mental changes clients experience when they improve from treatment One conclusion was

that all mental disorders can be cured using words though it may take time These findings represented a solution to challenges that psychology and psychiatry had been trying to solve for over 150 years Significant Discoveries I found that mental disorders are mentally constructed more simply than previously believed by researchers psychologists and psychiatrists It is possible to investigate mental processes leading to mental distress and the experience of mental distress solely through words Mental well being and mental disorders are constructed of the same mental or mental biological material and in the same manner allowing the same methods to be used to treat mental disorders such as anxiety depression and schizophrenia as well as to develop mental well being and skills I Now Know for Sure I am now certain that knowledge of brain psychology and linguistic therapy can lead those with mental distress to take more control over their emotions and mental problems Additionally psychologists and health workers can treat clients with greater scientific certainty and predictability achieving faster and better results The most reliable evidence of this includes success stories from clients comments from international scientific journals and observations from colleagues who have observed my work with students mental distress over many years After 30 years of research and treating more than 1000 clients I am convinced that linguistic brain therapy not only helps individuals but also enables those who have studied the books to help others whether as clients parents leaders trainers or other psychologists For more information visit the website www.brainpsychology.pro Simple but not Easy The book Linguistic Brain Therapy explains how to treat clients in a way that helps them become mentally stronger feel better about themselves and more effectively take control of their lives The Books Offer the Necessary Knowledge The book on the Psychology of the Brain provides the essential knowledge needed to understand what happens mentally during the development of mental disorders Linguistic Brain Therapy based on Brain Psychology knowledge guides therapists consultants leaders parents and health workers on how to treat clients and assist both themselves and others For more information you can read my doctoral dissertation on mental distress and mental change available at the University Library in Oslo Are These Claims True The books on brain psychology and linguistic brain therapy are the strongest evidence supporting the claims mentioned above Practical evidence like success stories from clients and research findings will be shared on my websites in the future www.brainpsychology.pro If you are facing mental challenges whether as a scientist someone experiencing mental distress an athlete as a health worker or in any other role where you feel you are not coping well you may explore brain psychology and linguistic therapy for help These books can provide you and others with a better life for many years The books focus on positive emotions on mental resources and how the clients can cope better with mental disorders and on how to treat light mental disorders and more heavy mental ailments
