of a chemical grew over time into a sizable still growing item of course In the description of this development it becomes apparent how many different talents and trades it takes to develop manufacture and market a product Also given are indications of how academic research and applied research development quite often intentionally or not influence each other and can spur the creative process to the benefit of both Areas are outlined where the current often intense work employing resorcinol is aimed Thus the old chemical is shown to be involved in an intriguing tomorrow **Locke & Key** Joe Hill,2020
