Alliteration in the English and Scottish Popular Ballads Jessie Comfort Smith, 1917 Meters in Motion Emiliano Minerba, 2025-10-14 Researches in African poetries have approached it on many perspectives but on the other side the stylistics of these art forms have raised less interest Metre is an example of this In the Swahili and Wolof poetic traditions the existence of metrical patterns is a datum reported by scholars with very little further elaboration In particular these metrical patterns have often been seen as a mere adaptation of the Arabic ones This book aims at challenging this view offering a historical reconstruction of the development of the Swahili and Wolof metrical systems Particular attention is given to the role of the Arabic model this work shows that the Swahili and Wolof poetries presented an elaborated stylistics even before the Arabic model affected them In the case of Swahili one can even speak of preexisting metrical traditions The influence from Arabic has certainly deeply changed the local Swahili and Wolof stylistics of poetry but many elements of continuity exist between the two periods before and after it In these two contexts then stylistics has always been a fundamental trait of poetry and a more attentive look at its history can reveal much of the overall development of the poetic tradition in general

The Literary Magazine, and American Register ,1804 The Road to Writing Sue Cowley,2012-10-11 A practical accessible guide to developing young children s mark making and early communication skills from bestselling education author Sue Cowley *Ecology and Literatures in English* Françoise Besson,2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare s theatre to ecopoetics from travel writing to detective novels from children s books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts **Exploring Creativity Through Writing** Alan Maley,Sharoon Sunny,2025-08-01 The book explores the nature of human creativity and its importance in education with reference to past and ongoing work on creativity theory It aims to direct the attention of teachers to the need for creativity in education by dispelling the mystique surrounding it and the feelings of inadequacy or apprehension it may evoke in educators particularly in the Asia region The book offers an introduction to creativity in writing the rationale for including it in language programmes the benefits it can bestow and the results it can produce as well as dealing with common objections to it It divides creative writing into two major sections poetry and stories followed by a copious set of varied classroom activities For each activity a standard format is adopted to offer teachers maximum support in implementing the procedures including supplementary comments on each activity It is distinct for its accessibility and clarity its abundance of practical and ready touse classroom activities and its unique combination of theoretical underpinnings and practical implementation This book will be useful to students pre service teachers and researchers who are new to the teaching of English Language both in the Asian context and in the wider world It will also be an essential companion to practicing in service teachers and Teacher Trainers to further sharpen their concepts and skills Traits of Good Writing Jennifer Overend Prior,Jennifer Prior,2007-06-13 Help students improve their writing skills by implementing useful strategies that can be used by today s teachers Nabokov's Fifth Arc J. E. Rivers,Charles Nicol,2014-09-10 In his autobiography Speak Memory Vladimir Nabokov compared his life to a spiral in which twirl follows twirl and every synthesis is the thesis of the next series The first

four arcs of the spiral of Nabokov's life: his youth in Russia, voluntary exile in Europe, two decades spent in the United States, and the final years of his life in Switzerland are now followed by a fifth arc: his continuing life in literary history, which this volume both explores and symbolizes. This is the first collection of essays to examine all five arcs of Nabokov's creative life through close analyses of representative works. The essays cast new light on works both famous and neglected and place these works against the backgrounds of Nabokov's career as a whole and modern literature in general. Nabokov analyzes his own artistry in his Postscript to the Russian Edition of *Lolita*, presented here in its first English translation, and in his little-known *Notes to Ada* by Vivian Darkbloom, published now for the first time in America and keyed to the standard U.S. editions of the novel. In addition to a defense of his father's work by Dmitri Nabokov and a portrait interview by Alfred Appel Jr., the volume presents a vast spectrum of critical analyses covering all Nabokov's major novels and several important short stories. The highly original structure of the book and the fresh and often startling revelations of the essays dramatize as never before the unity and richness of Nabokov's unique literary achievement.

Traits of Good Writing

(Traits of Good Writing) , **The Metre of Beowulf** Michael Getty, 2011-11-02 This book presents a novel treatment of the metre of *Beowulf*, an Old English epic poem of uncertain date and origin, which is nonetheless considered one of the gems of Germanic Alliterative Verse. Building on recent advances in generative linguistics, the analysis presented in this book offers compelling explanations for a wide range of metrical phenomena that have been observed but only poorly understood for over a century.
