close cutting

WITH THE ALLEN

CYLINDER MOWER ATTACHMENT

This Attachment has been designed for use where a closer cut is required than that obtained with the standard cutting assembly or Universal Foot.

It consists of a 20-inch cylinder, with five blades driven directly from the engine by means of a special link belt, giving a speed considerably higher than usual. This entirely eliminates ridging, and allows "bents" and tougher grasses to be cut.

A large grass box can be supplied, and the high cutting speed throws the grass well to the back of the box, allowing full use of its capacity. When used without the box the cut grass is spread well ahead, and does not clog the cutting cylinder. The height is adjusted by two set-screws controlling skids; the sole plate is also accessible, and easily set when required.

The cutting cylinder is carried on large diameter ball bearings, and the blades and sole plate are made from best quality material. Any stretch or wear in the belt is quickly taken up by the removal of a link—an operation needing no tools.

If any obstruction is noticed, the nice balance of the machine enables the mower to be lifted clear by depressing the handlebars. In the same way, paths can be crossed with the mower raised from the ground.

This Mower Attachment is slightly offset, so that it can be used close up to the edge of the grass area.

When travelling any distance the machine can be run under its own power, the belt being removed temporarily from the driving pulley.
