

14 ALLERGENS

coming to a food label near you

The way allergens are labelled on pre-packed foods is changing because of new regulations. The Food Information Regulation, which comes into effect December 2014, introduces a requirement that food businesses must provide information about the allergenic ingredients used in any food they sell or provide.

There are 14 major allergens which need to be mentioned (either on a label or through provided information such as menus) when they are used as ingredients in a food. Here are the allergens, and some examples of where they can be found:

Celery / Celeriac

This includes celery stalks, leaves, seeds and the root called celeriac. You can find celery in celery salt, salads, some meat products, soups and stock cubes.

Cereals Containing Gluten

Wheat looks as soft and innocent as wheat flour, yes, but it will soon be often found in foods containing flour, such as some types of baking powder, bakery ingredients, bread, cakes, pastries, meat products, pasta, poultry, soups and food foods which are dusted with flour.

Crustaceans

Crabs, lobster, prawns and crayfish are crustaceans. Shrimp, prawns, often used in Thai and southeast Asian cuisine or salads, is an ingredient in fish and fish.

Eggs

Eggs are often found in cakes, some meat products, ice cream, mayonnaise, pasta, puddings, soups and pastries or foods brushed or glazed with egg.

Fish

You will find fish in some fish soups, pilchard, sardines, salad dressings, meat cakes and Maccaroni cheese.

Lupin

Yes, lupin is a flower, but it's also found in flour! Lupin flour and seeds can be found in some types of bread, pastries and even in pasta.

Milk

Milk is a common ingredient in butter, cheese, cream, milk powder and yogurt. It can also be found in foods brushed or glazed with milk, and in powdered soups and soups.

Molluscs

These include mussels, hard shells, squid and scallops, but can also be commonly found in oyster sauce or as an ingredient in fish cakes.

Mustard

Liquid mustard, mustard powder and mustard seeds fall into this category. This ingredient can also be found in breads, cakes, marinades, meat products, salad dressings, soups and soups.

Nuts

It may be obvious with peanuts (which are actually a legume and grow underground), this ingredient refers to nuts which grow on trees, like walnuts, almonds and hazelnuts. You can find nuts in breads, biscuits, crackers, desserts, nut powders (often used in Asian cuisine), stir-fried dishes, ice cream, marzipan (almond paste), nut oils and sauces.

Peanuts

Peanuts are actually a legume and grow underground, which is why it's sometimes called a groundnut. Peanuts are often used as an ingredient in biscuits, cakes, crackers, desserts, soups (such as satay sauce), or as an ingredient in nut peanut flour.

Sesame Seeds

These seeds can often be found in bread (spiced bread or hardtack), honey for example, breadsticks, biscuits, soups and oil and butter. They are sometimes crushed and used in salads.

Soya

Often found in bean curd, soyabean beans, miso paste, textured vegetable protein, soya flour or tofu, soya is a staple ingredient in eastern food. It can also be found in desserts, ice cream, meat products, soups and vegetable products.

Sulphur Dioxide (Sulphites)

This is an ingredient often used in dried fruit such as raisins, dried apricots and prunes. You might also find it in meat products, soft drinks, vegetables as well as in wine and beer. If you have asthma, you have a higher risk of developing a reaction to sulphur dioxide.

Promoting Health and Academic

Success David A. Birch, Donna M. Videto, 2015-02-17 There is increasing evidence that health and academic success go hand in hand. Now educators and health professionals have a new model: the Whole School Whole Community Whole Child (WSCC) approach to use in promoting health and learning in the schools. This new approach developed by leaders in education and health is a transition from the coordinated school health (CSH) model that was introduced in 1987. Promoting Health and Academic Success is a new resource for the transition from CSH to WSCC. Written by national leaders in education and school health, some of whom were involved in the development of WSCC, this book provides direction for education and school health professionals interested in promoting student health. It is valuable for individuals and groups interested in advocating for WSCC and for those engaged in the planning, implementation, and evaluation of this new approach. The book also is a resource for both undergraduate and graduate students in courses that address a coordinated approach to school health. Each chapter includes application activities that engage students in translating their learning in the context of WSCC simulations. In addition, the School Health in Action feature provides case studies that demonstrate the impact school health programs are having in schools across the United States. Applicable to both students and professionals, Promoting Health and Academic Success includes an appendix that presents a thorough guide to using school health assessment tools created by organizations such as the Centers for Disease Control and Prevention, Association for Supervision and Curriculum Development, and the National Association of State Boards of Education. Following is a partial listing of the tools: The School Health Index helps schools improve health and safety policies; The State Schools Health Policy Database facilitates sharing of policies across states; The Health Education Curriculum Analysis Tool encourages children to adopt and maintain health-enhancing behaviors; The Physical Education Curriculum Analysis Tool assists schools in analyzing their curricula and comparing it to national physical education standards; A Parent Engagement tool shares strategies for involving parents in school health. The book is presented in five parts: Part I unveils the new WSCC model, explains its components, and provides a historical overview of coordinated school health; Part II offers insights into the Whole Child initiative and examines the evidence linking health and academic success; Part III explores the crucial role of school administration in ensuring success, ways to meet the diverse needs of students and their families, and methods for getting the community involved; Part IV delves into planning, implementation, and evaluation aspects of WSCC; Part V looks to the future for WSCC and provides perspectives from the field. The appendix supplies the assessment instruments and tools. Including Learners with Medical Needs in School Cath Kitchen, 2025-06-06 This accessible book is packed with information and strategies that will build your confidence in ensuring that children and young people with medical needs have equal access to education and can thrive academically, socially, and emotionally. Including Learners with Medical Needs in School provides school staff with a guide for best practice in supporting learners with complex health conditions in their schools. The book includes an overview of legal considerations and the responsibilities of schools and local authorities. How to create a welcoming environment and support

the smooth reintegration to school following absences as well as advice on managing medication and creating strong home school partnerships Guidance on working effectively with hospital schools medical alternative provision paediatric hospitals and mental health units A wealth of case studies top tips and tried and tested practical strategies that can be easily applied without huge costs or training Signposting to further resources as well as downloadable specimen policies exemplar Individual Healthcare Plans and training materials By implementing the recommendations in this book schools can make a commitment to inclusion and make a real difference to the educational experience of children with medical needs It is essential reading for SENCOs pastoral leads and senior leaders as well as a useful resource for school governors and school nurses
