Fundamental Concepts and Skills for Nursing is a uniquely featured textbook designed to make a worthy impact on its readers. The book is customised as per the revised B Sc Nursing curriculum prescribed by the Indian Nursing Council INC to meet the learning requirements of undergraduate students. Nursing professionals aspiring for higher education or career progression will also find this book useful for reference. The full colour text contains theoretical nursing concepts step by step skills and procedures and clinical applications to build a strong foundation in the patient care experience. The underlying framework of all the chapters pivots around the nursing process and also portrays the concepts like psycho social aspects, critical thinking, communication skills, inter professional collaborations, patient family education and cultural integrity. Discusses more than 80 essential skills and around 30 petite forms of skills with step by step format supported with coloured illustrations along with action rationale format. Each chapter starts with key terms, objectives and has supportive glossary. Enhanced with stimulating highpoints such as Special Clinical Cues, Cultural Considerations, Lifespan Considerations, Focused Assessment, Health Promotion, Legal, Ethical Considerations, Patient Education, QSEN Considerations, Safety Alert and Think Critically boxes. Includes nursing process framework featuring the application of the nursing process and nursing care plans reinforcing its application in the clinical setting. More than 20 Nursing Care Plans illustrating each step of the nursing process. Includes Concept Maps that help students visualise concepts addressed in the text and learn how a condition or response relating to symptoms, treatments and side effects can affect more than one body system.

*Physiology Coloring Workbook* Kenneth Axen, Kathleen Vermitsky Axen, 1997 Physiology Coloring Workbook is a breakthrough approach to learning and remembering the body's processes. Written and illustrated by experts who are both research scientists and teachers, it features 250 striking original illustrations that will give students a clear and enduring understanding of physiology. Learning interactively through coloring thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks. Physiological processes are fully explained and complex subjects are approached through the gradual introduction of simple drawings. The authors employ a logical and consistent use of color to convey information; for example, arterial blood is always red, whereas venous blood is blue and capillary blood is violet. Each lesson includes clearly displayed labels and specific coloring instructions. This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology, biology, nursing, physical therapy and rehabilitation, medical technology, nutrition, physical education, allied health and health sciences. The 250 plates in the book are organized in the following sections: Homeostasis, The Cell, Transport Mechanisms, Nervous System, Muscle, Cardiovascular System, Renal System, Respiratory System, Gastrointestinal System, Metabolism, Endocrine System, Reproduction.
