In 1988 we were contacted by the Societe Botanique de France and the French section of The International Association of Plant Tissue Culture IAPTC to organise a symposium on Biotechnology and its impact in Agriculture
The committee members of these two French associations had the vision to realize that this was a time to depart from the traditional themes in plant science
Moreover since one of the major areas of our interest for the past few years has been that of Plant biotechnology we welcomed the idea of organizing this meeting
Another reason for the acceptance of this challenge was the location of Amiens in Picardy and the enthusiasm of the local governing authorities
Picardy region is one of the major agricultural zones in France and indeed of Europe
This fact and several other aspects of Picardy Agriculture suggested that this conference would be an excellent opportunity to combine the basic aspects of plant tissue culture and genetic engineering with the applications for plant improvement *Report of the Superintendent of Public Instruction*
