Blood Flow through the Heart

The superior vena cava receives blood from the head, neck, upper limbs, and chest. The inferior vena cava receives blood from the trunk, viscera, and lower limbs. The deoxygenated venous blood travels into the right atrium. From there, it enters the right ventricle through the tricuspid valve and then exits the heart through the pulmonary artery where the oxygenated blood is distributed to the rest of the body.

the left atrium. From there, it enters the left ventricle through the mitral/bicuspid valve and then exits the heart through the aortic valve where the oxygenated blood is distributed to the rest of the body.
