Ancient China

Ancient China was a fascinating place full of rich history and amazing inventions. The ancient Chinese people were known for their many accomplishments in art, science, and technology.

One of the most famous inventions to come out of ancient China was paper. Before the Chinese invented paper, people wrote on bamboo strips or silk. But with the invention of paper, writing became much easier and more accessible to everyone.

Another important invention from ancient China was the compass. The compass was used for navigation, helping sailors find their way across the seas. This invention revolutionized travel and exploration.

The ancient Chinese were also skilled in the art of making pottery. They created beautiful ceramics that were not only functional but also works of art. Many of these ancient Chinese pottery pieces are still admired and studied today.

In addition to their inventions, the ancient Chinese also made significant advancements in medicine. They believed in the balance of yin and yang in the body and used herbal remedies to treat illnesses. Acupuncture, a practice where thin needles are inserted into the skin at specific points, was also developed in ancient China.

One of the most famous landmarks in ancient China is the Great Wall. This massive wall was built to protect the Chinese empire from invaders. It stretches over 13,000 miles and is one of the Seven Wonders of the World.

The ancient Chinese also made important contributions to philosophy. Confucius, a famous Chinese philosopher, believed in the importance of family, respect, and moral values. His teachings have had a lasting impact on Chinese culture.

Overall, ancient China was a place of great innovation and creativity. The ancient Chinese people made important contributions to many fields, including art, science, and technology. Their legacy continues to inspire and influence us today.

Ancient China Comprehension Passage:

Language as Bodily Practice in Early China Jane Geaney, 2018-03-01 Challenges the idea held by many prominent twentieth century Sinologists that early China experienced a language crisis Jane Geaney argues that early Chinese conceptions of speech and naming cannot be properly understood if viewed through the dominant Western philosophical tradition in which language is framed through dualisms that are based on hierarchies of speech and writing such as reality appearance and one many Instead early Chinese texts repeatedly create pairings of sounds and various visible things This aural visual polarity suggests that texts from early China treat speech as a bodily practice that is not detachable from its use in everyday experience Firmly grounded in ideas about bodies from the early texts themselves Geaney's interpretation offers new insights into three key themes in these texts the notion of speakers intentions yi the physical process of emulating exemplary people and Confucius's proposal to rectify names zhengming
