Module 1 - Judging the Relevance and Worth of Ideas, Soundness of Author's Reasoning, and the Effectiveness of the Presentation

People have a tendency to assume that what is written is accurate. This is not the case all the time. There are elements that we have to check before we can accept that something written has relevance and worth of ideas, soundness of author's reasoning, and an effective presentation. These elements include:

1. **PROBLEM** - An article needs to have a real problem that needs to be resolved; something that is addressed to a specific kind of person.
2. **SPEAKER'S STAND** - The speaker's stand can be directly expressed or implied. Whichever in this case, a speaker's stand should be present in the article.
3. **PROPOSED SOLUTION/S** - For the author's presentation of the article, a concrete solution has to be recommended before the piece of writing ends.
4. **REFERENCE/S** - To ensure credibility in an author's work, references from other resources should be readily available, may it be online or in printed form. If it is hard to find another reference that has the same claims as that of the writer, then, the claim can be considered unfounded or fictitious.

Module 2 - Relating Text Content to Particular Social Issues, Concerns or Dispositions in Real Life
