policymakers and parents *South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05
 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI [Lessons from the Kalahari](#) Monica Hendricks, 2020-05-05 Lessons from the Kalahari Tracking Teachers Professional Development explores how Northern Cape teachers who were enrolled in a Bachelor of Education in service course responded to three professional development modules specialising in mathematics education English language teaching and Foundation Phase teaching respectively Mainly through fine grained analyses of their classroom practice the studies in this volume demonstrate how these teachers grappled with new content knowledge and pedagogical innovations to improve the quality of teaching in their classrooms The chapters include case studies that range across a variety of pedagogical topics including mathematics and English teachers classroom practices involvement of parents of Foundation Phase learners and learners autonomous mathematics learning The book makes an original empirically based contribution to the understanding of the challenges confronting primary and secondary school teachers in remote rural

Milligan, Leon Tikly, 2018-10-16 Almost all low and middle income postcolonial countries now use English or another dominant language as the medium of instruction for some if not all of the basic education cycle Much of the literature about language in education in such countries has focused on the instrumentalist value of English on one side and the rights of learners to high quality mother tongue based education on the other The polarised nature of the debate has tended to leave issues related to the processes of learning in English as a Medium Instruction EMI classrooms under researched This book aims to provide a greater understanding of the existing challenges for learners and educators and potential strategies that can support more effective teaching and learning in EMI classrooms Contributions illustrate the impact that learning in English has on learners in a range of regional national and local contexts and put forward theoretical and empirical analyses to support more relevant and inclusive educational policies This volume was originally published as a special issue of Comparative Education South Africa's Democracy at the Crossroads Daniel Silander, Charlotte Silander, Herman van der Elst, Pieter Heydenrych, 2022-04-18 South Africa's democracy faces increasing challenges from within whether from protest bad governance or general public dissatisfaction South Africa's Democracy at the Crossroads explores the question what are the challenges to future democratization in South Africa Teaching Language Ana Maria Barcelos Ferreira, 2009 **A Survey of Race Relations in South Africa** South African Institute of Race Relations, 1972 **Advances in Operations Research Education** Jeroen Beliën, Ana Paula Teixeira, Hans W.
