Clinical Biomechanics in Human Locomotion Andrew Horwood, Nachiappan Chockalingam, 2023-04-10. Clinical Biomechanics in Human Locomotion: Gait and Pathomechanical Principles explores the clinical management of gait disturbing or gait induced pathologies and biomechanical variances during gait between individuals. The book discusses what is required to make terrestrial human locomotion safe and what causes pathology within a context of high locomotive and morphological variability. The interaction of genetics epigenetics developmental biology and physiology under the influence of locomotive biomechanics and metabolic energetics drives evolution. Such biological pressures on survival are essential in understanding the locomotive biomechanics of modern humans. In addition, lifestyle including gait speed adaptability established during the growth influences of anatomical development is also considered. Links human locomotive biomechanics to medicine physiology evolutionary anatomy and medicine. Prepares students bioengineers and clinicians for the reality of utilizing biomechanical principles in clinical practice while also informing researchers of environmental limits. Includes further concepts in gait mechanics such as lower limb length gait speed and how to calculate locomotive costs.

Ligaments of the Knee Alfred J. Tria Jr., Giles R. Scuderi, 2025-01-11. This is the first machine generated literature overview on the ligaments of the knee. Introduced and curated by experts in knee surgery, it provides a sound summary of the current knowledge base on knee ligamentous anatomy kinematics and surgical procedures. The auto summaries have been generated by a recursive clustering algorithm via the Dimensions Auto Summarizer by Digital Science, handled by Subject Matter Experts and the editors of this book. The editors of this book selected which SN content should be auto summarized and decided its order of appearance. Please be aware that these are extractive auto summaries which consist of original sentences but are not representative of its original paper since we do not show the full length of the publication.
