

Anatomy & Physiology Exam 1 Study Guide

Chapter 1: Core Principles

- **Anatomy:** study of the structure of body parts and their relation to one another
- **Physiology:** function of body parts
 - form follows function

What are the seven characteristics of life? (Now 8)

- **Homeostasis:** maintain internal environment
- **Organization:** every organism is made up of at least 1 cell
- **Metabolism:** anabolism + catabolism
 - Living things obtain and use materials and energy
- **Growth + development**
 - Growth: increase in size
 - Development: cells divide and differentiate
- **Adaptation:** evolve over time
- **Respond to stimuli:** responding to environment
- **Reproduction:** sexual and asexual
- **Universal genetic code:** living things are based on DNA
 - Genetic code is basically the same for all organisms

Describe the major structural levels of organization of the human body

- **Chemical:** many organelles make up a cell
- **Cellular:** many cells make up a tissue
- **Tissue:** many tissues make up an organ
- **Organ:** many organs make up an organ system
- **Organ system:** many organ systems make up a human body
- **Organismal level**

Criner,Rodger E. Barnette,Gilbert E. D'Alonzo,2010-06-27 Critical care medicine is a dynamic and exciting arena where

complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.

A Curriculum for Plastic Surgery Edward Luce, 2025-05-27 This book offers a comprehensive curriculum on plastic surgery centered on adult learning principles. The pedagogical structure includes a base of cognitive knowledge that consists of the entire spectrum of plastic surgery: reconstructive and aesthetic. A guide for an interactive discussion of each component of the knowledge base, a set of multiple choice questions with a syllabus of explanation of correct and incorrect responses, and clinical cases to illustrate each element. Over one hundred modules constitute the curriculum, all of which are grouped into thirteen general categories. Each module includes a selected bibliography of relevant and contemporary readings, a discussion guide of broad questions and answers for a faculty member to drive an interactive discussion of the module, a set of multiple choice questions for each module to serve as a short written quiz, and 1-3 cases that are utilized in a case base conference to discuss the practical application of cognitive knowledge to problem solving of a clinical scenario. Finally, a several page review of the particular case provides an optimal approach to diagnosis and treatment. **A Curriculum for Plastic Surgery** provides an encyclopedic yet facile vehicle to deliver a comprehensive, contemporary, and interactive curriculum. The curriculum reflects the author's four decade long career in academic practice and teaching within this field.
