(A Wild Thing Book)** Laura Krantz,2024-10-08 Inspired by her popular Wild Thing podcast journalist Laura Krantz incorporates the scientific method and her journalistic skills to determine if magic might be real in Do You Believe in Magic Magic spells and curses hexes and potions superstition and rituals We ve all heard stories of alchemists attempting to turn abundant lead into precious rare gold Or of poor unfortunate souls asking potion masters to brew up unappetizing concoctions that will help them find love And of course we re familiar with curses muttering magical words for the purposes

of exacting revenge on an enemy or protecting a hidden treasure Who wouldn't like the idea of special powers or control over the natural world It seems pretty fun even if it's just the stuff of fantasy books and movies But a lot of what we call magic has grounding in real practices In fact magic is at the root of many scientific fields from chemistry to botany to astronomy and has been an important part of human culture for thousands of years Do You Believe in Magic takes readers through a world where magic and science collide What do they have in common Where do they differ What role has magic played in our history and the history of science Why is magic still significant even when it doesn't seem to line up with reality And is it possible to be scientifically minded and still believe in magic Readers are encouraged to weigh the facts and go beyond their gut assumptions to stretch their imaginations and think about why magic and science might be two sides of the same coin Includes color illustrations an at home science magic experiment glossary bibliography and index A Wild Thing series The Search for Sasquatch Is There Anybody Out There Do You Believe in Magic
