Research and Development in Progress U.S. Atomic Energy Commission. Division of Biology and Medicine,1968 Blue Light Effects in Biological Systems H. Senger,2012-12-06 Four years ago The Blue Light Syndrome was published as the Proceed ings of the 1 st International Conference on the Effect of Blue Light in Plants and Microorganisms Subsequently the interest in this fascinating and growing field of re search has further increased as is reflected by numerous publications Blue light effects cover such a wide spectrum of organisms responses and methods that communication among scientists with

backgrounds in biology biochemistry and biophysics is particularly necessary These facts not only justified but demanded calling the Blue Light Family together again In spite of many financial problems the second conference attracted 113 active members from 19 countries The 2nd International Conference on The Effect of Blue Light in Plants and Microorganisms was held in July 1984 like the first at the University of Marburg The organizer could again rely on the help of the International Advisory Committee W Briggs Stanford M Furuya Tokyo J Gressel Rehovot S Miyachi Tokyo W Rau München J Schiff Waltham P S Song Lubbock The very generous financial assistance from the DFG and the support of the Philipps Universität Marburg and its Sonderforschungsbereich Zellenergetik and Zelldifferenzierung were the prerequisites to organizing the conference The present book consists of 56 original papers The partitioning into eight chapters is always a problem The grouping of different aspects of the papers into these chapters has not always been obvious so that one or the other contribution could possibly fit in another chapter
