all 21 presets, styles, and automations

Deleting (aka trashing) Preferences

When InDesign is behaving erratically, and operating system and fonts don't seem to be the source of the problem, deleting (aka trashing) preferences often solves the problem.

[Mac OS X] While pressing Shift + Opt + Cmd + Ctrl, start InDesign. When asked if you want to delete the preference files, Click Yes.

[Windows 7 and like XP] While pressing Shift + Ctrl + Alt, start InDesign. When asked if you want to delete the preference files, Click Yes.

This action deletes two files: InDesign Defaults and InDesign SavedData. To search for these files, make sure you search also in Hidden and System files. You can delete these two files manually, instead of holding down the key combination at start of program. Afterward, once InDesign is restarted, factory-default versions of these two files are regenerated.

Open Recent list will be lost when you reset preferences. There is no work-around for this. And unless these are manually saved, Document Presets, Transparency Flattener Presets, Stroke Styles, and Print Presets will be lost when you trash preferences.

Note This report was edited for InDesign CS6; the main folder is Version 6.0/en_US. InDesign CS5.5 is Version 5.0/en_us. InDesign CS5 is Version 4.0/en_us. InDesign CS4 is Version 4.0/en_us. InDesign CS3 is the Version 3.0 which does not have a sub-folder.
