

Advanced Accounting - Chapter 2

- The acquisition method embraces the - ANS fair value measurement for measuring and assessing business activity.

A business combination is the formation of a single economic entity, an event that occurs - ANS whenever one company gains control over another

Business combinations can be created in several different ways - ANS 1. Statutory merger
2. Statutory consolidation
3. Acquisition by one company of a controlling interest in the voting stock of a target company.

Statutory merger - ANS only one of the original companies remains in business as a legally incorporated enterprise.

- a. Assets and liabilities can be acquired with the seller then dissolving itself as a corporation.
- b. All of the capital stock of a company can be acquired with the assets and liabilities then transferred to the buyer followed by the seller's dissolution

Statutory consolidation— - ANS assets or capital stock of two or more companies are transferred to a newly formed corporation

Acquisition by one company of a controlling interest in the voting stock of a target company. Dissolution does not take place; both parties retain - ANS their separate legal incorporation. The result is a parent and subsidiary

- Fair value is defined as - ANS the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair Value Valuation techniques - ANS 1. The Market Approach - The market approach estimates fair values using other market transactions involving similar assets or liabilities.
2. The Income Approach - based on the present value of future cash flows
3. The Cost Approach - based on current replacement cost.

The acquisition method replaced the purchase method. For combinations resulting in complete ownership, it is distinguished by four characteristics - ANS 1. All assets acquired and liabilities assumed in the combination are recognized and measured at their individual fair values (with few exceptions).

2. The fair value of the consideration transferred provides a starting point for valuing and recording a business combination.

- a. The consideration transferred includes cash, securities, and contingent performance obligations.
- b. Direct combination costs are expensed as incurred.
- c. Stock issuance costs are recorded as a reduction in paid-in capital.
