Iaizzo,2010-03-11 A revolution began in my professional career and education in 1997 In that year I visited the University of Minnesota to discuss collaborative opportunities in cardiac anatomy physiology and medical device testing The meeting was with a faculty member of the Department of Anesthesiology Professor Paul Iaizzo I didn't know what to expect but as always I remained open minded and optimistic Little did I know that my life would never be the same During the mid to late 1990s Paul Iaizzo and his team were performing anesthesia research on isolated guinea pig hearts We found the work appealing but it was unclear how this research might apply to our interest in tools to aid in the design of implantable devices for the cardiovascular system As discussions progressed we noted that we would be far more interested in reanimation of large mammalian hearts in particular human hearts Paul was confident this could be accomplished on large hearts but thought that it would be unlikely that we would ever have access to human hearts for this application We shook hands and the collaboration was born in 1997 In the same year Paul and the research team at the University of Minnesota including Bill Gallagher and Charles Soule reanimated several swine hearts Unlike the previous work on guinea pig hearts which were reanimated in Langendorff mode the intention of this research was to produce a fully functional working heart model for device testing and cardiac research ACCCN's Critical Care Nursing - E-Book Leanne Aitken,Andrea Marshall,Wendy Chaboyer,2011-11-21 A revised new edition of this comprehensive critical care nursing text developed with the Australian College of Critical Care Nurses ACCCN This second edition of ACCCN's Critical Care Nursing has been fully revised and updated for critical care nurses and students in Australia and New Zealand As well as featuring the most recent critical care research data current clinical practice policies procedures and guidelines specific to Australia and New Zealand this new edition offers new and expanded chapters and case studies The ultimate guide for critical care nurses and nursing students alike ACCCN's Critical Care Nursing 2e has been developed in conjunction with the Australian College of Critical Care Nurses ACCCN As with the first edition the text in ACCCN's Critical Care Nursing 2e reflects the expertise of ACCCN's highly qualified team of local and international critical care nursing academics and clinicians This authoritative nursing resource takes a patient centred approach encouraging practising critical care nurses and students to develop effective high quality critical care nursing practice ACCCN's Critical Care Nursing 2e outlines the scope of critical care nursing before detailing the core components and specialty aspects of critical care nursing such as intensive care emergency nursing
