result rankings The Last Man Who Knew Everything Mike Hockney,2013-07-25 Three hundred years ago it was possible to have read all of the important books in the world Most intelligent people of the time believed the world was a living organism Matter was alive hylozoism or mind was everywhere panpsychism or God was everywhere theism or God and Nature were one pantheism A hundred years later the world was viewed as a vast purposeless machine Either there was no God atheism or he was a remote God of Laws deism and not of revelation and salvation Leibniz was the last genius to know everything and to accept that the universe was an organism a mathematical organism Leibniz was the secret author of the Illuminati s Grand Unified Theory of Everything based on nothing He created an entire universe out of a Big Bang singularity comprising infinite monads zeros each with infinite energy capacity This is the story of the first mathematical Theory of Everything Leibniz s monads have one last incredible secret to reveal they are souls **The God Factory** Mike Hockney,2011-10-23 Illumination the religion of the Ancient Order of the Illuminati began with Pythagoras and is the world s only Logos religion i e a rational religion founded on mathematics science and philosophy It has no connection with Mythos religions such as Judaism Christianity and Islam Illumination is the Grand Unified Theory of Everything linking science religion psychology philosophy and even the paranormal It does so via the only medium of truth and absolute knowledge mathematics which Pythagoras enigmatically declared to be the arche the fundamental substance of existence Whereas science is based on mathematical materialism Illumination uses Leibnizian mathematical idealism This is one of a series of books providing the ultimate answers to the nature of existence *C# Notes for Professionals* Mr. Rohit Manglik,2024-06-03 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Life on the Brink** Andrew Stephenson,2015-03-06 Praise for Life on the Brink an achingly raw memoir that balances existential quandaries with a healthy sense of humor Eric Editor Have you ever wondered why we re here or what it s all for Do you sometimes get so caught up in your thoughts that you forget that they aren t real and only exist in your head What if you could change your perspective and view the events in your life as happening for you rather than to you Do you think this could change your reaction Could it then also have a positive impact on your overall outlook and how you view each day Life on the Brink is a book of memories and reflections told with the author s charismatic and hilarious take on growing up raising a family and facing life s many challenges This book will help you laugh a lot cry a bit and slow down long enough to think You might even end up a little more hopeful and believe the journey to discovery is worth the struggle Born to Believe Andrew Newberg,Mark Robert Waldman,2007-10-02 Born to Believe was previously published in hardcover as Why We Believe What We Believe Prayer meditation speaking in tongues What do these spiritual activities share and how do they differ Why do some people believe in God while others embrace atheism From the ordinary to the extraordinary beliefs give

meaning to the mysteries of life They motivate us provide us with our individual uniqueness and ultimately change the structure and function of our brains In *Born to Believe* Andrew Newberg MD and Mark Waldman reveal for the very first time how our complex views memories superstitions morals and beliefs are created by the neural activities of the brain Supported by groundbreaking original research they explain how our brains construct our deepest convictions and fondest assumptions about reality and the world around us Using science psychology and religion the authors offer recommendations for exercising your brain in order to develop a more life affirming flexible range of attitudes Knowing how the brain builds meaning value spirituality and truth into your life will change forever the way you look at yourself and the world *Religion and the Natural Sciences* James E. Huchingson, 2005-02-07 The first half of *Religion and the Natural Sciences* is an introduction to the discussion of science and religion Here the reader learns why there is any debate at all and what resources exist for responding to it The second half deals with specific issues that arise in the individual sciences from astronomy and physics to biology and ecology Any project hoping to connect science and religion must supply the categories of connection which are found primarily although not exclusively in philosophy The simplicity of the arrangement and the nature of the selections are intended to make *Religion and the Natural Sciences* available to as wide an audience as possible including students from the sciences and technology the professions the humanities and liberal studies and theology **The Origins of the Universe for Dummies** Stephen Pincock, Mark Frary, 2012-01-24 Do you want to learn about the physical origin of the Universe but don't have the rest of eternity to read up on it Do you want to know what scientists know about where you and your planet came from but without the science blinding you Course you do and who better than *For Dummies* to tackle the biggest strangest and most wonderful question there is *The Origins of the Universe For Dummies* covers Early ideas about our universe Modern cosmology Big Bang theory Dark matter and gravity Galaxies and solar systems Life on earth Finding life elsewhere The Universe's forecast [The God Game](#) Mike Hockney, 2013-09-30 What is the answer to everything Pythagoras provided a glimpse of the answer 2 500 years ago when he declared All things are numbers Mathematics is literally everything Unlike science mathematics offers certainty and absolute knowledge Mathematics unifies science religion and metaphysics and is the true Grand Unified Theory of Everything No experiment can ever contradict a mathematical truth Mathematics is the ONLY answer to everything Mathematics is the ONLY subject inherently about eternal Platonic truth The God Series starting with *The God Game* reveals the astonishing power of ontological mathematics to account for everything Isn't it time to convert to the world's only rational religion Illuminism the Pythagorean religion of mathematics that infallibly explains all things and guarantees everyone a soul that's not only eternal and indestructible but also has the capacity to make each of us a true God Isn't it time to become Illuminated The God Series is what God ought to have delivered to humanity rather than the Bible Knowledge rather than faith Truth rather than fantasy **Personhood and Health Care** David C. Thomasma, David N. Weissstub, Christian Hervé, 2013-04-17 PERSONHOOD AND HEALTH CARE

This book arose as a result of a pre conference devoted to the topic held June 28 1999 in Paris France The pre conference preceded the Annual Congress of the International Academy of Law and Mental Health Other chapters were solicited after the conference in order to more completely explore the relation of personhood to health care The pre conference was held in honor of Yves Pelicier who led so many of our French colleagues in medicine philosophy and ethics as Christian Herve notes in his Tribute As health care is aimed at healing persons it is important to realize how difficult it is to construct a theory of personhood for health care and thus a theory of how healing in health care comes about or ought to occur The book is divided into four parts Concepts of the Person Theories of Personhood in Relation to Health Care and Bioethics Person and Identity and Personhood and His Relations Each section explores a critical arena in constructing the relation of personhood to health care Although no exploration of this nature can be exhaustive every effort was made to present both conflicting and complementary views of personhood from within similar and different philosophical and religious traditions

Wanted, More than Human Intellectual Property Johanna Gibson, 2024-12-27 This book analyses animal creativity in order to unsettle the dominant assumptions that underpin current ideas of authorship and ownership in intellectual property Drawing upon theories of animal behaviour and cognitive ethology the book exposes and disrupts the anthropocentrism that informs prevailing assumptions about creativity intentionality and authorship within the field of intellectual property towards a new theory of authorship and personhood through play and the playful Moving on to challenge the invocation of a more general human nonhuman distinction in this context the book also engages the challenge to this distinction posed by artificial intelligence Incorporating critical animal studies behavioural science ethology critical legal studies and legal philosophy the book presents a new idea of creativity which undermines the kind of rivalrous models now common in the field of intellectual property This book will be of considerable interest to those studying and teaching in the area of intellectual property as well as in animal law It will also appeal to legal theorists and others working in the social sciences in the areas of posthumanism and animal studies

Creating the Soul Body Robert E. Cox, 2008-04-18 Outlines the principles and mechanics of the soul body the spiritual vehicle that enables individual consciousness to survive the body's death Shows that the ancient Vedic Egyptian Hebraic and Pythagorean traditions shared and understood this spiritual practice Reveals modern science as only now awakening to this

ancient sacred science Ancient peoples the world over understood that individual consciousness is rooted in a universal field of consciousness and is therefore eternal surviving the passing of the physical body They engaged in spiritual practices to make that transition maximally auspicious These practices can be described as a kind of alchemy in which base elements are discarded and higher levels of consciousness are realized The result is the creation of a vehicle a soul body that carries consciousness beyond physical death These spiritual preparations are symbolized in the Vedic Egyptian and Hebraic traditions as a divine stairway or ladder a step by step path of ascent in which the practitioner raises consciousness by degrees until it comes to rest in the bosom of the infinite thereby becoming immortal This spiritual process explains the reincarnation of the Dalai Lama for example whose reincarnation is confirmed in infancy through physical and spiritual signs indicating that the consciousness has been carried from one lifetime to the next In Creating the Soul Body Robert Cox maps the spiritual journey of consciousness behind this sacred science of immortality and reveals the practice of creating a soul body in detail He also shows that this ancient spiritual science resembles advanced theories of modern science such as wave and particle theory and the unified field theory and reveals that modern science is only now awakening to this ancient science of immortality
