which suggests that revolutionaries have agency and the Marxist school which sees state institutions as nothing more than a front for class interests Skocpol's model assumes that states are autonomous bureaucratic institutions which act in their own interests a fundamental reimagining based on fresh interpretations of the evidence Her analysis extends beyond the causes of revolution to their consequences and her argument that the revolutionary state that survives is the one that successfully implements a far reaching program of reform helps to explain not only why the three revolutions she studied have proved enduringly influential but also why hundreds of others less successful are barely remembered today *Hearings, Reports and Prints of the Senate Committee on the Judiciary* United States.
