### Function Family Application

#### Identifying Function Families in

Example: It's only Tuesday and we're already in the high school for the week. The basketball coach suggests to use ball numbers each night. The data that follows is from the equation  $y = 1.5x + 100$  to monitor the points,  $P$ , from each day's game, where  $x$  is the number of minutes each player plays.

1. Name the function family. What aspects of the equation indicate that it belongs to that family?
2. Make a table to represent the situation.
3. Use technology to graph the function.
  - a. What is the slope?
  - b. What is the y-intercept?
  - c. How does the graph relate to the situation?
4. Name the independent variable in this situation.
5. Name the dependent variable in this situation.
6. Give three or four examples of the function.
7. Does the situation represent a function? If not, explain why, relating to the context of the situation.
8. Does the situation represent a function? If not, explain why, relating to the context of the situation.
