Emphasis on clinical assessment, history taking, examination, and communication skills, equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, heart failure is not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely and then considered its cause, not always ischaemic heart disease, its presentation, acute, chronic, left or right ventricular, or both, and most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent, and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume. 250 cases organised into the 5 stations of
