Factory service automatic transmission fluids possess physical properties and performance features which differ substantially from the minimum Type A Suffix A specification requirements In some cases either the transmission life would be impaired by the use of a minimum Type A Suffix A fluid or desirable performance features would be deteriorated These special factory requirements are discussed including low temperature

fluidity frictional properties clutch durability antiwear characteristics elastomer compatibility and oxidative stability The specialty factory fluids present questions concerning make up oil additions and drain and refill practices In spite of these however transmission manufacturers will continue to include the lubricant as an integral part of the total design Thus service station fluids should be carefully chosen to compromise manufacturers conflicting recommendations Automatic Transmission Manual Louis Forier,1971 **Acura 3.5RL Service Manual 96-00** Honda Giken Kōgyō Kabushiki Kaisha,1999 **Workshop Manual for Model 45 Automatic Transmission** Chrysler United Kingdom Limited,1973 Motor's Automatic Transmission Manual. 3rd Edition L.
