
Unit 6 APES Exam Review Questions with correct Answers 100% correct

Compare a nonrenewable to a renewable energy source - answer Nonrenewable resources exist in a fixed amount and cannot be replaced on a human timescale (Examples: coal, oil, natural gas, nuclear). Renewable resources can be replenished naturally at or near the rate of consumption (Examples: solar, biomass, geothermal, wind, hydropower).

Identify three examples of renewable resources and three examples of nonrenewable resources. - answer Non Renewable- coal, oil, natural gas
Renewable- solar, biomass, geothermal

How do developed and developing countries compare when it comes to energy consumption? Why? - answer Developed countries use more energy because they have more resources too and have more things that need energy consumption compared to developing countries who use other resources besides energy

What type of country (developed or developing) uses more fossil fuels? Why? - answer Developing countries use more fossil fuels because they don't have other resources to create energy like developed countries

Does industrialization lead to high energy consumption rates? Why/why not? - answer Yes, because more industries use energy for lighting and working machines which leads to a lot of energy that is produced in industries and factories

Why is wood fuel commonly used in developing countries? - answer Easy accessibility

What are some environmental concerns with using wood as an energy source? - answer Particle emissions that turn into smog

List three air pollutants that are emitted during the burning of coal. - answer Mercury, lead, sulfur dioxide

Place the following 8 events in chronological order: the oil spill of the Exxon Valdez; the meltdown of the reactor at Chernobyl; the discovery of contamination at Love Canal; The first Earth Day; the leak of methyl isocyanate in Bhopal; the drafting of the Kyoto

Emotions of Animals and Humans Shigeru Watanabe, Stan Kuczaj, 2012-08-31 This book takes a multidisciplinary approach to emotion with contributions from biologists psychologists neuroscientists robot engineers and artists A wide range of emotional phenomena is discussed including the notion that humans sophisticated sensibility as evidenced by our aesthetic appreciation of the arts is based at least in part on a basic emotional sensibility that is found in young children and perhaps even some non human animal species As a result this book comprises a unique comparative perspective on the study of emotion A number of chapters consider emotions in a variety of animal groups including fish birds and mammals Other chapters expand the scope of the book to humans and robots Specific topics covered in these chapters run the gamut from lower level emotional activity such as emotional expression to higher level emotional activity such as altruism love and aesthetics Taken as a whole the book presents manifold perspectives on emotion and provides a solid foundation for future multidisciplinary research on the nature of emotions Narrative Persuasion. A Cognitive Perspective on Language Evolution Francesco Ferretti, 2022-08-23 This book explores the evolutionary and cognitive foundations of human communication focusing on narrative as its distinctive dimension Within a framework of continuity with both the communication of our hominin predecessors and that of non human animals the book is about a twofold proposal It includes the idea that human and animal communication has an intrinsically persuasive nature along with the hypothesis that humans developed narrative forms of communication in order to enhance their persuasive abilities In this view narrative persuasion becomes the feature that distinguishes human communication from animal communication The study of the transition from

animal communication to language addresses both the selective pressures that led communication for persuasive purposes to take a narrative form and the cognitive architectures and expressive systems that enabled our ancestors to cope with the selective pressures of persuasive narrative based communication Language evolution is interdisciplinary even from the specific perspective of evolutionary pragmatics chosen here Therefore this book is intended for researchers working in fields such as cognitive sciences philosophy evolutionary biology cognitive psychology and primatology It also represents a valuable resource for advanced students in cognitive sciences linguistics and philosophy Transposable Elements, Transcriptomics, and Diseases Luis M. Vaschetto, 2025-11-09 Transposable elements (TEs) are mobile DNA sequences once referred to as selfish DNA While they have contributed significantly to genome evolution their movement can often disrupt genes and lead to disease To counteract this organisms have developed post transcriptional transcriptional and epigenetic mechanisms to control TE activity This book explores the complex interplay between mobile genetic elements and human health providing a comprehensive overview of TE biology their modes of action and the strategies employed to suppress their movement and offering valuable insights into potential therapeutic interventions targeting TE related diseases In particular the book reviews how TEs affect gene expression and contribute to diseases such as cancer neurodegenerative diseases and inherited disorders Other topics include TE polymorphisms epigenetic control co opted functions non coding RNAs and their roles in environmental stress and immune pathways Providing a comprehensive reference on the subject this book is intended for researchers and advanced students in genetics and related disciplines
