Behaviour, Development and Evolution

Patrick Bateson,2017-02-20 The role of parents in shaping the characters of their children the causes of violence and crime and the roots of personal unhappiness are central to humanity Like so many fundamental questions about human existence these issues all relate to behavioural development In this lucid and accessible book eminent biologist Professor Sir Patrick Bateson suggests that the nature nurture dichotomy we often use to think about questions of development in both humans and animals is misleading Instead he argues that we should pay attention to whole systems rather than to simple causes when trying to understand the complexity of development In his wide ranging approach Bateson discusses why so much behaviour appears to be well designed He explores issues such as imprinting and its importance to the attachment of offspring to their parents the mutual benefits that characterise communication between parent and offspring the importance of play in learning how to choose and control the optimal conditions in which to thrive and the vital function of adaptability in the interplay between development and evolution Bateson disputes the idea that a simple link can be found between genetics and behaviour What an individual human or animal does in its life depends on the reciprocal nature of its relationships with the world about it This knowledge also points to ways in which an animal s own behaviour can provide the variation that influences the subsequent course of evolution This has relevance not only for our scientific approaches to the systems of development and evolution but also on how humans change institutional rules that have become dysfunctional or design public health measures when mismatches occur between themselves and their environments It affects how we think about ourselves and our own capacity for change

Dividing the spoils Henrietta Lidchi, Stuart Allan, 2020-09-29 At a time of heightened international interest in the colonial dimensions of museum collections Dividing the Spoils provides new perspectives on the motivations and circumstances whereby collections were appropriated and acquired during colonial military service Combining approaches from the fields of material anthropology imperial and military history this book argues for a deeper examination of these collections within a range of intercultural histories that include alliance diplomacy curiosity and enquiry as well as expropriation and cultural hegemony As museums across Europe reckon with the post colonial legacies of their collections Dividing the Spoils explores how the amassing of objects was understood and governed in British military culture and considers how objects functioned in

museum collections thereafter suggesting new avenues for sustained investigation in a controversial contested field **The Mismatching of America** Seymour I. Schwartz, 2008 The history of five major cartographic errors of American geography that have had considerable resonance long after they were perpetrated The Mismatching of America presents and analyzes the significant cartographic errors that have shaped the history of the United States Perhaps the most blatant error is the very name America that honors Amerigo Vespucci who not only never set foot on North American soil but also played no significant role in the discovery of South America The appearance of the name America imprinted on a map ensured its permanence Other significant errors explored in The Mismatching of America include Giovanni da Verrazzano's misinterpretation of Pamlico or Albermarle Sound for the Pacific Ocean thereby suggesting the presence of an isthmus in the middle of the North American continent the existence of a direct North West passage between the Atlantic and Pacific oceans the misconception that California was an island and the insertion on Lake Superior of a fictitious island that is specifically referred to in defining the boundary of the United States The inclusion of pertinent rare maps enhances this rich and revealing narrative of several intriguing episodes in the history of the geographic evolution of the United States Seymour I. Schwartz is the Distinguished Alumni Professor of Surgery at the University of Rochester and an expert on the history of mapping America He is the coauthor of Mapping of America and author of The French and Indian War 1754-1763 The Imperial Struggle for North America and This Land is Your Land *Unpredictability and Presence* Hans Jacob Orning, 2008-05-31 This book inspired by historians like Fredric Cheyette Stephen White and William Miller applies a legal anthropological framework to Norwegian history At the same time it focuses on what happens when pre-state conflict patterns encounters a more stable royal power in the high middle ages The author demonstrates how in the 12th and 13th century the king under strong clerical influence is depicted as just and omnipresent However a detailed survey of the king's conflicts shows that he to a substantial degree based his dominion on unpredictability and presence The results presented in this book will certainly be discussed but few will disagree that it formulates the question of state formation in a new and challenging way In addition it clearly demonstrates the relevance of studying Scandinavian history as part of European history **Jane's All the World's Aircraft**, 2009 **The Eponym Dictionary of Amphibians** Bo Beolens, Michael Watkins, Michael Grayson, 2013-04-22 New species of animal and plant are being discovered all the time When this happens the new species has to be given a scientific Latin name in addition to any common vernacular name In either case the species may be named after a person often the discoverer but sometimes an individual they wished to honour or perhaps were staying with at the time the discovery was made Species names related to a person are eponyms Many scientific names are allusive esoteric and even humorous so an eponym dictionary is a valuable resource for anyone amateur or professional who wants to decipher the meaning and glimpse the history of a species name Sometimes a name refers not to a person but to a fictional character or mythological figure The Forest Stubfoot Toad *Atelopus farci* is named after the FARC a Colombian

guerrilla army who found refuge in the toad's habitat and thereby it is claimed protected it. Hoipollo's Bubble nest Frog *Pseudophilautus hoipolloi* was named after the Greek for the many but someone assumed the reference was to a Dr Hoipollo. Meanwhile the man who has everything will never refuse an eponym. Sting's Treefrog *Dendropsophus stingi* is named after the rock musician in honour of his commitment and efforts to save the rainforest. Following the success of their Eponym Dictionary of Reptiles the authors have joined forces to give amphibians a similar treatment. They have tracked down 1 609 honoured individuals and composed for each a brief pithy biography. In some cases these are a reminder of the courage of scientists whose dedicated research in remote locations exposed them to disease and even violent death. The eponym ensures that their memory will survive aided by reference works such as this highly readable dictionary. Altogether 2 668 amphibians are listed.

The Literary Gazette and Journal of Belles Lettres, Arts, Sciences, 1825 Custerology Michael A. Elliott, 2008-08-26

On a hot summer day in 1876 George Armstrong Custer led the Seventh Cavalry to the most famous defeat in U.S. military history. Outnumbered and exhausted the Seventh Cavalry lost more than half of its 400 men and every soldier under Custer's direct command was killed. It's easy to understand why this tremendous defeat shocked the American public at the time. But with *Custerology* Michael A. Elliott tackles the far more complicated question of why the battle still haunts the American imagination today. Weaving vivid historical accounts of Custer at Little Bighorn with contemporary commemorations that range from battle reenactments to the unfinished Crazy Horse memorial Elliott reveals a Custer and a West whose legacies are still vigorously contested. He takes readers to each of the important places of Custer's life from his Civil War home in Michigan to the site of his famous demise and introduces us to Native American activists, Park Service rangers and devoted history buffs along the way. Elliott shows how Custer and the Indian Wars continue to be both a powerful symbol of America's bloody past and a crucial key to understanding the nation's multicultural present. Elliott is an approachable guide as he takes readers to battlefields where Custer fought American Indians to the Michigan town of Monroe that Custer called home after he moved there at age 10 to the Black Hills of South Dakota where Custer led an expedition that gave birth to a gold rush. Steve Weinberg *Atlanta Journal Constitution*. By *Custerology* Elliott means the historical interpretation and commemoration of Custer and the Indian Wars in which he fought not only by those who honor Custer but by those who celebrate the Native American resistance that defeated him. The purpose of this book is to show how Custer and the Little Bighorn can be and have been commemorated for such contradictory purposes. *Library Journal* Michael Elliott's *Custerology* is vivid, trenchant, engrossing and important. The American soldier George Armstrong Custer has been the subject of very nearly incessant debate for almost a century and a half and the debate is multicultural, multinational and multimedia. Mr Elliott's book provides by far the best overview and no one interested in the long haired soldier whom the Indians called Son of the Morning Star can afford to miss it. Larry McMurtry *The American Educator* Daniel Garrison Brinton, Marcus Benjamin, 1897 *Zell's Popular Encyclopedia*, 1882 **A Different Time** National Museum National

Museum of Australia,2008 Herbert Basedow was an anthropologist geologist and medical doctor who used photography to document his expeditions into central and northern Australia between 1903 and 1928 A Different Time The Expedition Photographs of Herbert Basedow 19031928 Zell's Popular Encyclopedia Leo de Colange,1871
