Native American Nationalism and Nation Re-building Simone Poliandri, 2016-05-01 Presents an interdisciplinary analysis of the recent developments of Native American nationalism and nationhood in the United States and Canada Bringing together perspectives from a variety of disciplines this book provides an interdisciplinary approach to the emerging discussion on Indigenous nationhood The contributors argue for the centrality of nationhood and nation building in molding and concurrently blending the political social economic and cultural strategies toward Native American self definitions and self determination Included among the common themes is the significance of space conceived both as traditional territory and colonial reservation in the current construction of Native national identity Whether related to historical memory and the narrativization of peoplehood the temporality of indigenous claims to sovereignty or the demarcation of successful financial assets as cultural and social emblems of indigenous space territory constitutes an inalienable and necessary element connecting Native American peoplehood and nationhood The creation and maintenance of Native American national identity have also overcome structural territorial impediments and may benefit from the inclusivity of citizenship rather than the exclusivity of ethnicity In all cases the political effectiveness of nationhood in promoting and sustaining sovereignty presupposes Native full participation in and control over economic development the formation of historical narrative and memory the definition of legality and governance

Development and Use of Compact Instruments for Tropospheric Investigations Based on Optical Spectroscopy from Mobile Platforms Alexis Merlaud, 2013-03-31 This thesis presents the development of four different remote sensing instruments dedicated to atmospheric research and their use in field campaigns between 2008 and 2012 The instruments are based on uv visible spectrometers and installed respectively on a scientific aircraft ultralight aircraft and cars One of the instruments is targeted to operate from an Unmanned Aerial Vehicle UAV The Differential Optical Absorption Spectroscopy DOAS technique is used to quantify the molecular absorption in the spectra of scattered sky light These absorptions are then interpreted by modeling the transfer of radiation in the atmosphere Airborne platforms enable new measurement geometries leading for instance to a high sensitivity in the free troposphere On the other hand a miniaturization effort is required especially for the instruments onboard ultralight aircraft and UAV Reaching the limited size

weight and power consumption is possible through the use of compact spectrometers and computers together with custom built electronics circuits and housings A common target of the different experiments is to quantify tropospheric nitrogen dioxide NO₂ Regarding this trace gas the developed instruments provide complementary findings such as the vertical distribution in the pristine Arctic or the levels in the exhaust plumes of large cities like Riyadh Car borne measurements in North West Europe reveal the horizontal gradients of surface NO₂ at various scales The UAV payload is intended to produce high spatial resolution maps of tropospheric NO₂ columns

Antarctic Peninsula Region of the Southern Ocean Eugene G. Morozov, Mikhail V. Flint, Vassily A. Spiridonov, 2022-01-01 The book is based on results from the Russian expedition in the region of the Antarctic Peninsula and Powell Basin in the northern part of the Weddell Sea as well as on the review of earlier research in the region The main goal of the research was to collect the newest data and study the physical properties and ecology of this key region of the Southern Ocean Data analysis is supplemented with numerical modeling of the atmosphere ocean interaction and circulation in the adjacent region including research on rogue waves The focus of the study was the Antarctic Circumpolar Current currents and water properties in the Bransfield Strait and Antarctic Sound properties of seawater currents ecosystem and biological communities in the Powell Basin of the northwestern Weddell Sea and their variations An attempt is made to reveal the role of various components of the Antarctic environment in the formation of biological productivity and maintenance of the Antarctic krill population This is especially important as in the last decades

the Antarctic environment has experienced significant changes related to the global climatic trends Arctic Ice Shelves and Ice Islands Luke Copland, Derek Mueller, 2017-05-30 This book provides an overview of the current state of knowledge of Arctic ice shelves ice islands and related features Ice shelves are permanent areas of ice which float on the ocean surface while attached to the coast and typically occur in very cold environments where perennial sea ice builds up to great thickness and or where glaciers flow off the land and are preserved on the ocean surface These landscape features are relatively poorly studied in the Arctic yet they are potentially highly sensitive indicators of climate change because they respond to changes in atmospheric oceanic and glaciological conditions Recent fracturing and breakup events of ice shelves in the Canadian High Arctic have attracted significant scientific and public attention and produced large ice islands which may pose a risk to Arctic shipping and offshore infrastructure Much has been published about Antarctic ice shelves but to date there has not been a dedicated book about Arctic ice shelves or ice islands This book fills that gap **The Queer Life of Things** Anne M.
