Press Summary - Illinois Information Service Illinois Information Service,1986 **Studio Potter** ,1988 **Commonly Asked Questions about Consumer Rights & Their Answers** Kansas. Insurance Department. Consumer Assistance Division,1993* **Information Obligations and Disinformation of Consumers** Gert Straetmans,2019 This book focuses on recent developments in consumer law specifically addressing mandatory disclosures and the topical problem of information overload It provides a comparative analysis based on national reports from countries with common law and civil law traditions in Asia America and Europe and presents the reports in the form of chapters that have been drafted on the basis of a questionnaire and which use the same structure as the questionnaire to allow them to be easily compared The book starts with an analysis of the basic assumptions underlying the current consumer protection models and examines whether and how consumer models adapt to the new market conditions The second part addresses the information obligations themselves first highlighting the differences in the reported countries before narrowing the analysis down to countries with a general pre contractual information duty particularly the transparency requirements that often come with such a duty The next part examines recent developments in the law on food labelling commercial practices and unfair contract terms in order to identify whether similar traits can be found in European and non European jurisdictions The fourth part of the book focuses on specific information obligations in the financial services and e commerce sectors discussing the fact that legislators are experimenting with different forms of summary disclosures in these sectors The final part provides a critical appraisal of the recent developments in consumer information obligations addressing the question of whether the multiple criticisms from behavioural sciences necessitate abandonment or refinement of current consumer information models in favour of new more adequate forms of consumer protection and providing suggestions Protecting consumers - the system for enforcing consumer law Great Britain: National Audit Office,2011-06-15 Unfair treatment of consumers ranging from pressure selling to systematic scams by criminals is costing billions of pounds each year but the system for enforcing consumer law is not delivering value for money The overall scale of this so called consumer detriment particularly that caused by doorstep crime is not being properly evaluated leading to the inefficient allocation of resources Although much detriment occurs at the regional and national level incentives are weighted against a coordinated approach which goes beyond local areas While there are no reliable figures NAO estimates the cost of detriment which cannot be tackled at local level is more than 4.8 billion each year Central government provides annual funding of 34 million to tackle crime which crosses the borders between local authorities but this is relatively low compared to the scale of the problem The Department for Business Innovation and Skills estimates that the annual funding for Trading Standards Services will reduce from 213 million to about 140 million by 2014 affecting action to address this problem The framework for prioritizing and allocating cases introduced by the Office of Fair Trading is not being applied as intended But formal structures for

supporting the model are not in place in seven of the eleven regions and there is still a lack of clarity over who should be taking cases forward As a result the OFT has been able to take enforcement action on only two of the 15 cases referred to it in the last two years Consumer protection : the Austrian answer to a world-wide challenge Thomas Georg Winkler,1987

Consumer protection law ,1991 **Consumer Protection in Choice of Law** Giesela Ruhl,2011 Consumer protection in choice of law is a fairly young concept In fact the idea that consumers might be as much in need of protection in choice of law as in other areas of law did not loom large before the second part of the 20th century However after the consumer protection movement gained pace in the 1960ies and 1970ies academics courts and legislators were quick to transfer the concept into choice of law First legislative provisions were enacted in the 1970ies with 41 of the Austrian Act of Private International Law as well as Article 5 of the European Convention on the Law Applicable to Contractual Obligations Rome Convention In the 1980ies Switzerland followed suit with the adoption of Art 120 of the new Swiss Act on Private International Law Today consumer protection in choice of law is an integral part of legal systems around the world Thus it comes as a surprise that up to now the pertaining rules and regulations have received very little attention from economic theory Even though there is by now a substantial body of literature that deals with different aspects of conflict of laws from an economic perspective the question of whether and if so how consumer should be protected in choice of law has been neglected In the paper at hand I fill this gap More specifically I analyse how choice of law rules should be designed in order to protect consumers in an efficient way To this end I proceed in three steps In the first step I analyse the economic rationale for consumer protection in choice of law I show that consumers are in need of protection because they suffer from information asymmetries In the second step I analyse how consumer protection can and should be afforded from an economic perspective I focus on three mechanisms first self healing powers of markets second duties of information and third direct regulation of consumer contracts I conclude that neither markets nor information duties are likely to limit the risks flowing from information asymmetries As a result I argue that the economically best way to protect consumers is to directly regulate consumer contracts In the third and final step I therefore analyse different models of consumer protection in view of their economic efficiency I conclude that the European model of limiting party autonomy with the help of the so called preferential law approach Art 6 Rome I Regulation is a good economic compromise The same holds true for the in practice very similar

American model of limiting party autonomy with the help of the fundamental public policy doctrine 187 Restatement Second of Conflict of Laws Both models trump all other ways of regulating choice of law in consumer contracts most importantly the Swiss solution of excluding party autonomy in consumer contracts all together *The Consumer Protection Act Made Easy* Neville John Melville,2011 **Textbook on Consumer Protection Law** ,2017 Commentary On The Consumer Protection Act 1986 J.
