Activity Anorexia W. Frank Epling, W. David Pierce, 2013-06-17 This volume provides researchers and clinicians with an insight into recent developments in activity anorexia Much of the basic information on the topic has come from animal literature the theory of activity anorexia is built on an animal model of self starvation rats placed on a single daily feeding run more and more over days stop eating and die of starvation Additionally experiments that for ethical or practical reasons could not be done with humans may be conducted with other animals The animal research is extending the understanding of biologically based reward mechanisms that regulate eating and exercise environment behavior interactions that affect anorexia and the biochemical changes that accompany physical activity and starvation Increasingly however the impact of physical activity on human anorexia is being directly investigated eight out of fourteen research chapters in this volume are based on human research Some researchers are interested in the impact of hyperactivity and caloric restriction on human reproductive function Other authors are investigating physically active subgroups of people considered to be at risk for anorexia Finally several clinician researchers suggest how physical activity and extreme dieting interact for anorexia nervosa patients Chapter authors were asked to present their views independent of the editors argument that when it is present physical activity is central to anorexia Many of the contributors

disagree with the editors about the details of activity anorexia A few suggest that excessive physical activity is either incidental to or an epiphenomenon of anorexia Most authors are however in accord with the view that physical activity reduces food consumption which further drives up activity that results in even less caloric intake No matter what their perspective all contributors agree that hyperactivity frequently accompanies self starvation in humans and other animals The end result is a lively book that provides a source of ideas for both researchers and practitioners Handbook of Big Data and Analytics in Accounting and Auditing Tarek Rana,Jan Svanberg,Peter Öhman,Alan Lowe,2023-02-03 This handbook collects the most up to date scholarship knowledge and new developments of big data and data analytics by bringing together many strands of contextual and disciplinary research In recent times while there has been considerable research in exploring the role of big data data analytics and textual analytics in accounting and auditing we still lack evidence on what kinds of best practices academics practitioners and organizations can implement and use To achieve this aim the handbook focuses on both conventional and contemporary issues facing by academics practitioners and organizations particularly when technology and business environments are changing faster than ever All the chapters in this handbook provide both retrospective and contemporary views and commentaries by leading and knowledgeable scholars in the field who offer unique insights on the changing role of accounting and auditing in today s data and analytics driven environment Aimed at academics practitioners students and consultants in the areas of accounting auditing and other business disciplines the handbook provides high level insight into the design implementation and working of big data and data analytics practices for all types of organizations worldwide The leading scholars in the field provide critical evaluations and guidance on big data and data analytics by illustrating issues related to various sectors such as public private not for profit and social enterprises The handbook s content will be highly desirable and accessible to accounting and non accounting audiences across the globe
