P. Ortleb, Richard Cadice, 1986-03-01 Color overheads included The activities in this book center on the scientific study of the conditions of the atmosphere Basic concepts in weather and climate are presented Each of the twelve teaching units in this book is introduced by a color transparency which emphasizes the basic concept of the unit and presents questions for discussion Reproducible student pages provide reinforcement and follow up activities The teaching guide offers descriptions of the basic concepts to be presented background information suggestions for enrichment activities and a complete answer key *User-Centered Interaction Design Patterns for Interactive Digital Television Applications* Tibor Kunert, 2009-06-12

Technology is meant to make life easier and to raise its quality Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology Even so technology may change quickly and people and their habits change slowly With the aim of supporting user acceptance of iTV the focus of this book is on the usability of iTV applications A method for developing interaction design patterns especially for new technologies is presented for the first time The main characteristics covered in this new approach are systematic identification of recurrent design problems usability as a quality criterion for design solutions integration of designers into the pattern development process including identification of designers needs and iterative evaluation and optimisation of patterns to encourage designers to accept and use them usability testing to identify proven design solutions and their trade offs presentation of specific design guidelines
