Ray, Bichitrananda Patra, 2022-10-17 This book discusses an integration of machine learning with metaheuristic techniques that provide more robust and efficient ways to address traditional optimization problems. Modern metaheuristic techniques along with their main characteristics and recent applications in artificial intelligence, software engineering, data mining, planning, and scheduling logistics and supply chains are discussed in this book and help global leaders in fast decision making by providing quality solutions to important problems in business, engineering, economics, and science. Novel ways are also discovered to attack unsolved problems in software testing and machine learning. The discussion on foundations of optimization and algorithms leads beginners to apply current approaches to optimization problems. The discussed metaheuristic algorithms include genetic algorithms, simulated annealing, ant algorithms, bee algorithms, and particle swarm optimization.
