Matter—Properties and Changes

Section 3.1 Properties of Matter

In your textbook, read about physical properties and chemical properties of matter.

Use each of the terms below just once to complete the passage.

chemical density	mass properties	physical substance
---------------------	--------------------	-----------------------

Matter is anything with (1) mass and volume. A

(2) substance is a form of matter with a uniform and unchanging composition.

Substances have specific, unchanging (3) properties that can be observed.

Substances have both physical and chemical properties. (4) Physical

properties can be observed without changing a substance's chemical composition. Color,

tachness, and (5) density are examples. Other properties cannot be

observed without changing the composition of a substance. These are called

(6) chemical properties. An example is the tendency of iron to form

rust when exposed to air.

Label each property as either physical or chemical.
