

Periodic Table Lab

Name: _____

Problem:

Use your knowledge of the periodic table to determine the identity of each of the nine unknown elements in this activity.

- ⚡ The unknown elements are from the following groups in the periodic table. Each group listed below contains at least one unknown.

1 2 11 13 14 17 18

- ⚡ None of the known elements are one of the nine unknown elements.

Procedure:

1. Inspect the properties of the known elements.
2. Arrange the cards of the known elements like the periodic table.
3. Once the known elements are in place, inspect the properties of the unknowns to see where their properties would best "fit" the trends of the elements of each group.
4. In your data table, assign the proper element name to each of the unknowns. Record the symbol for each of the "unknowns" in your data table.

Data Table:

In your journal please!

Unknown #	Element Name	Element Symbol	Reason
1			
2			
3			
4			
5			
6			
7			

Conclusion:

Summarize your group's reasoning for assignment of each unknown (this is done in the data table).

Be prepared to complete a CER for ONE of your unknown elements.
