

Electrically Operated Tailgate Window

The electrically operated tailgate window (standard equipment on 9-passenger station wagons—optional on all others) may be opened by means of three switches:

1. A key operated switch on the tailgate.
2. A switch on the instrument panel.
3. A switch on the left rear interior trim panel (9-passenger models only).

To Open:

- By means of one of the above mentioned switches, lower the tailgate window fully. The tailgate cannot be opened unless the window is fully down.
- Lift the inside release handle to open the tailgate.

To Close:

- Slow the tailgate firmly to close.
- Roll the window up, if desired, by means of one of the three switches described above.

CONCEALED LUGGAGE SPACE

- In six-passenger styles the two-piece luggage space cover may be folded completely back and out of the way or may be completely removed as follows:

1. Fold the rear half of the cover over the front half. Lift the two halves until vertical with the floor.
2. Lift straight up on the left side of the cover, prying with a screwdriver to disengage the hinge pin from the floor bracket, then pull the entire cover to the left to disengage it from the right hinge.
3. Reverse the procedure to replace the cover.

- In nine-passenger models, the storage space is located beneath the third seat and is completely concealed when the seat is folded down.
